

RESOURCES

25 years of precision rubber and custom metal

About New Resources

Founded in 1998, New Resources Industrial Ltd. is a leading manufacturer of high-quality rubber components. Our product range includes:

- O-rings
- V-rings
- Gaskets
- Oil seals
- Custom-made parts

We maintain strict quality standards, evidenced by our certifications:

- GB/T 24001-2016 / ISO 14001:2015 (Environmental Management)
- ISO 9001:2015 (Quality Management)
- GB/T 45001-2020 / ISO 45001:2018 (Occupational Health and Safety)

We operate and manage two specialized manufacturing facilities:

- **C.Q.K Elastomer Manufacturing Co., Ltd:** Focused on custom rubber seals and components.
- **Zhangzhou Newfine Metal Workmanship Co. Ltd:** Specializing in precision metal fabrication, including iron and steel stamping, electroplating, CNC punching, and laser cutting.

At New Resources, we are committed to quality, sustainability, and the safety of our products and processes.

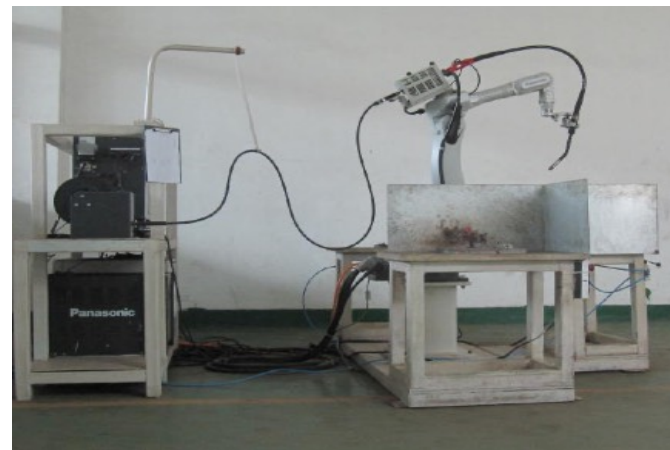

OUR SERVICE

New Resources Industrial Ltd specializes in high-quality manufacturing of rubber and metal components. With over 25 years of experience, we deliver tailored products to meet your

Rubber

- **Custom Rubber Components:** Tailored solutions for diverse applications, including seals, gaskets, and other specialized parts.
- **Vulcanized Rubber Products:** High-performance products designed for longevity and resilience in demanding environments.
- **Eco-Friendly Options:** Sustainable rubber materials that meet environmental standards.

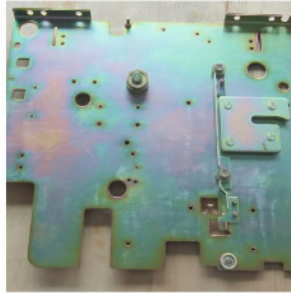

Our facility features modern machinery, including:

- **2 Open Mills** for efficient rubber processing.
- **1 Mixing Mill** to ensure consistent material blending.
- **10 Vulcanizing Press Machines** for high-quality rubber curing.
- **1 Automatic Trimming Machine** for precise finishing.
- **1 Polishing Machine** for a flawless surface finish.
- **3 Full Automatic Electroplating Production Lines** for durable coatings.
- **1 300-ton Laser Cutting Machine** for precise cutting.
- **3 300-ton CNC Punch Machines** for efficient punching operations.
- **8 CNC Lathes** for versatile machining.
- **1 Robot Spot Welder** for automated welding processes.
- **3 CNC Milling Machines** for complex component fabrication.

Metal

- **Precision Metal Fabrication:** Iron and steel stamping, welding, bending, electroplating, numerical control punching, and laser cutting.
- **Electroplated Components:** Durable metal parts with protective coatings to enhance longevity and performance.
- **CNC Machined Parts:** Precision-engineered components for various industrial applications, ensuring

Our Partners

- **Culligan Water:** Top-tier water treatment and filtration solutions.
- **ABB:** Global leader in electrification and automation technologies.
- **FILTROX:** Trusted partner for premium filtration systems.
- **HYDAC:** Specializes in hydraulic solutions for industrial applications.
- **Handicare:** Experts in mobility equipment and accessibility solutions.
- **Danaher:** Innovative tools and services in life sciences.
- **ADB Safegate:** Pioneers in airport performance solutions.
