上海懿周国际贸易有限公司

Brief Introduction

Shanghai Yizhou International Trade Co., Ltd. founded in 2006, is a foreign trader of socks, hats, scarves, shorts, bags and various household products. The company boasts convenient transportation since it is located in Chuansha New Town, Pudong New Area, close to Disneyland, only half an hour away from Pudong Airport and only one hour away from Yangshan Port.

[Office and Sample room]

As a nearly 20-year-old company, Yizhou International is familiar with the various processes of global trade. Our employees are experts of foreign trade. They will respond to customers' questions and requirements with professionalism and patience. In this sense, all customers will receive quality services all the way from sample-making, product delivery to after-sales services. Great reputation and credibility make Yizhou International stand out. We have established long-term partnership with more than 50 factories featuring mutual trust, mutual dependence and win-win cooperation and founded a socks factory and a sewing factory in Zhejiang Province. The wide range of our partners enables us to expand our product portfolio to almost all kind of socks and sewing products. Thanks to our cooperative factories, we are able to tailor samples to customer needs and deliver samples to customers in the shortest time. Our products can be ordered in small batches and for trial even though some suppliers are not bothered to do so. In addition, we also have our own designer team and R&D departments to make our products keep up with the ever-changing fashion trends, being your most fashionable option.

[Inspection Workshop]

Quality check is our priority. Experience tells us that defective products or products failing to be packed or boxed according to customers' requirements, if delivered to customers, will spell trouble, even lead to financial loss or reputation damage. In order to avoid such problems, we have established a quality management department to put in place strict inspection procedures before shipping. When the problem is found, the factory is required to correct it and the client will be notified. Owing to the great importance that we have attached to quality management, there is basically no complaint about the product quality from customers.

Since 2013, our company has established a quality inspection facility and warehousing center in Shanghai's Pudong district, further enhancing our quality management system. The quality inspection facility provides customized packaging services for combination sets according to client requirements. Spanning 3,000 square meters, the facility offers ample space while integrating storage and preservation functions. We have implemented a flexible batch-based shipment mechanism that enables rapid response to market demands, precise timing control for deliveries, and the formulation of highly efficient shipment plans with zero operational waste.
