

Hydroponics Growing System 10 Pods

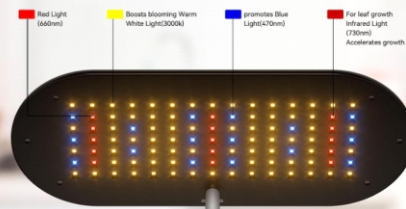

With Full Spectrum LED Grow Light

24W 1A, 10 Sponges, 1pcs pump
Garden container with LED light
3.6L Water tank.

24W Upgraded Full Spectrum LED Light

Provide abundant, precise, and
suitable light for your plants at
different growth stages.

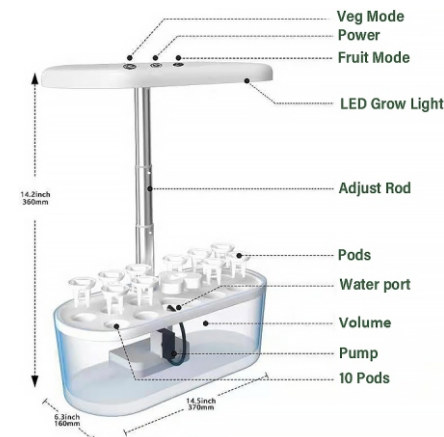

2 Modes

Veg Mode : Timer 14H-10H off.
Fruit Mode : Timer 12H-12H off.

2 Planting Modes

2 Smart Grow Modes for Veggies & Fruits; Turn on/off automatically. For leaf plants growing harvest leaves, choose Vegetables Mode which contains blue light. For fruit plants growing stronger, choose Flower & Fruits Mode which increases the red light.

Our hydroponics growing
system is designed with a
**silent IP68 water resistance
pump**

Which helps circulate water
increase water oxygen, and
continuously keep nutrients
circulating to the roots,
which helps plants grow 5x
faster than in soil
with BPA-free water tank

Home Smart Hydroponic System Plants Herb Vegetable Artificial Light

- ▶ **THE SMART CONTROL** panel is user-friendly and easily connects to their app. It offers an array of intelligent functions such as temperature and humidity display, vacation mode, water shortage reminders, and adjustable brightness.
- ▶ **Their SMART SOIL** comes enriched with all the necessary nutrients, eliminating the need for additional plant foods. The soil's pH level is pre-set, and it's made of natural materials, specifically coconut peat, allowing for a soil-free gardening experience.
- ▶ **THE HEIGHT ADJUSTABLE** feature allows plants to grow up to 32.5cm in height with no limitations, fostering healthier growth.
- ▶ With an impressive **11 PODS**, the SG01 enables you to grow an array of 11 different herbs, veggies, or flowers all at once.

We Did Exclusive Project For Our Clients

Personal Raised Garden

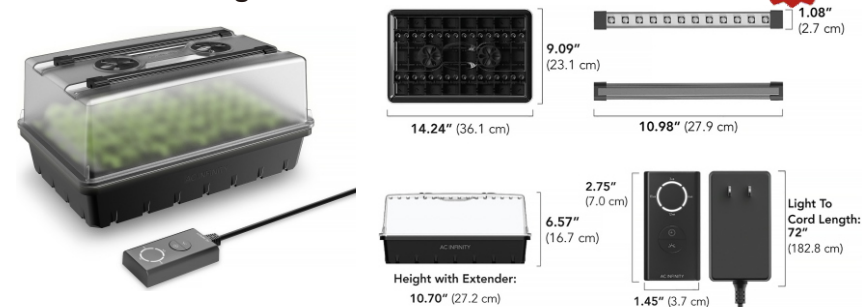

▶ DIMENSIONS:

Height 16 inches **Width** 18 inches **Length** 11 inches **Weight** 10 lbs

1. Solid wood frame
2. BPA-Free safe food grade plastic that makes it easy to clean after every growing season
3. An 8 pod tray that's expandable up to 12 making it easy to grow all the herbs, lettuces, roots, fruits, and flowers you need
4. Robust circular water system insuring your plants get nutrients when they need it
5. Easy to use companion app that guides you through growing from plant to harvest

Humidity Dome Germination Kit with LED Grow Light Bars

1. Clear, sturdy dome with glossy finish allows light penetration and provides precise humidity control
2. LED grow light bars maximize plant growth through uniform coverage and adjustable brightness levels
3. Dome includes additional height extension panels with adjustable vents for propagation projects
4. Drip and plant trays crafted for durability to support up to 40 seedlings while draining excess water

630W LED

► 42.8" x 43.3"

630W LED is designed to give a professional setup to growers of all levels. Precise and uniform distribution of PPFD keeps plants in stable conditions, and the full-spectrum light means that multiple types of plants can grow together in one space. Experience strong healthy growth and high yields of fruits and flowers with the **630W LED** at a lower running cost than its competitors.

- 630W Fully Dimmable
- 2.9 $\mu\text{mol}/\text{j}$ efficiency
- 1830 $\mu\text{mol}/\text{s}$ ppfd
- 50,000 hour Lifetime
- Max ambient temp: 35°C
- CCT: 3000K + 5000K + 660nm
- Controller compatible up to 200 fixtures

► dimmer

► Lighting Controller

- 24 hour timer
- Show output as W or %
- Select ballast type: 315 - 1000W
- Auto-dim at set temperature
- Sunrise/sunset period
- 2 outputs (main and aux)
- 2 temperature sensors
- Total number of ballasts: 200
