Q. How has Bodydot changed the way you operate your center?

Since implementing Bodydot, we have seen meaningful improvements in both client consultations and overall center operations.

Clients responded very positively from the beginning. Rather than relying on verbal explanations alone, Bodydot provides data-driven posture assessments that increase trust and engagement during consultations. As a result, we naturally saw an increase in personal training conversions.

In addition, our center has become recognized not simply as a fitness facility, but as a specialized center for rehabilitation and posture correction. This has helped reinforce our expertise among both prospective and existing members, while also contributing positively to our long-term brand positioning.

Q. Has Bodydot changed the way you manage customer consultations and center operations?

Since implementing Bodydot, our consultation process has become much more structured, and member engagement has improved significantly, especially during the initial consultation stage.

Because consultations are supported by objective, data-driven assessments, clients have greater confidence in our recommendations and services. As a result, trust has increased, strengthening our center's professional image and contributing positively to overall brand value.

Comprehensive Support from Revenue Growth to Remote Support

Support 01

Marketing Resource Support

We provide ready-to-use marketing resources, **including branded design assets and product images**, to help your center create effective marketing materials.

Support 02

Remote Technical Support

Our customer success team is always ready to **quickly identify and resolve issues remotely**, minimizing disruption to your center's operations.

Support 03

Sales Training Program

We provide on-site sales training focused on turning posture assessments into member engagement and revenue opportunities. Beyond product usage, **we help centers maximize business outcomes with Bodydot**.

Support 04

Usage Monitoring & Success Management

We regularly monitor Bodydot usage and provide guidance to help your center maximize adoption and long-term success.
