Company Profile

✈ Corporate culture

● Integrity

Integrity is the foundation for interactions with customers and partners.

● Collaboration

Collaboration promotes efficient cooperation across departments to solve problems.

● Innovation

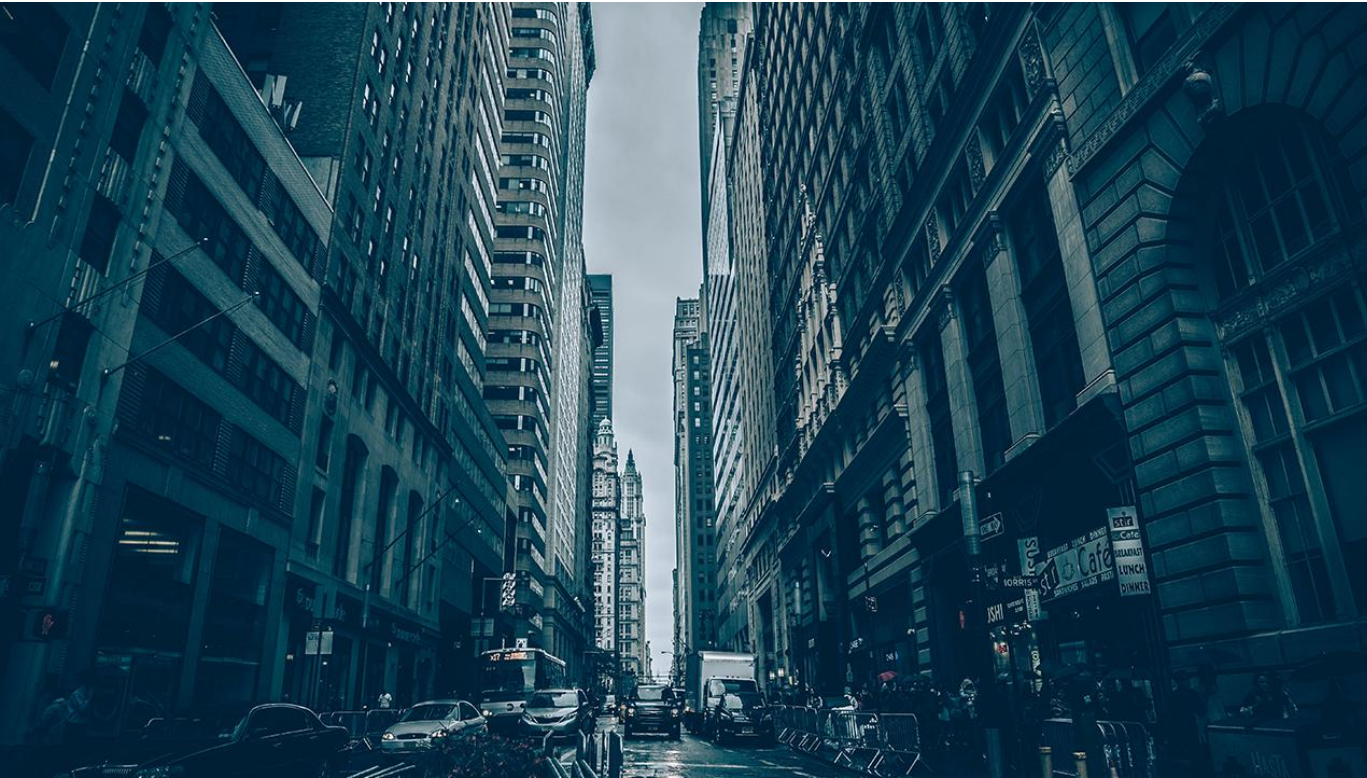

Innovation drives product upgrades and business expansion.

● Excellence

Our pursuit of the highest standards in quality and service drives the enterprise forward and shapes a positive corporate culture.

➤ Future Development

Intelligent production, diversified products, and international collaboration

In the future, Intelligent production with technologies like AI and IoT enhances efficiency and quality. 3D printing and virtual design meet personalized needs. Customized services and eco-friendly materials will be mainstream. Brand management emphasizes innovation. Explore international markets and integrate with related industries for growth.

Our Strength

• Important Equipments

• Work Environment

• Main Export Countries

➤ Important Equipments

Our factory is located in a new industrial zone with convenient transportation and has all kinds of advanced clothing production equipment. From intelligent cutting machines to high-speed sewing machines, to precision ironing equipment, these not only improve production efficiency, but also ensure the high quality of products, which has won us a significant advantage in the field of clothing manufacturing.

✈ Work Environment

Intelligent electric single piece flow sewing production line

The intelligent electric single-piece flow sewing production line is crucial in clothing production. It uses single-piece flow mode, avoiding backlogs. Equipped with advanced equipment like computer flat sewing machines, it has high precision and speed. With a data management system, it monitors production. This line brings higher efficiency, better quality and stronger competitiveness to clothing enterprises.
