安平县金爵五金网业有限公司

ANPING COUNTY JINJUE HARDWARE WIRE MESH CO.,LTD

公司介绍 COMPANY PROFILE

安平县金爵五金网业有限公司成立于1985年，位于著名的“中国丝网之乡”——安平县。它是一个专业生产加工金属丝和丝网各种产品以及贸易的出口型企业，其拥有先进的拉丝、镀锌和丝网编织设备。其主要产品包括：黑铁丝、镀锌丝、PVC涂塑丝、扣丝、U型丝、截断丝；不锈钢丝网、六角网、方眼网、轧花网、刀片刺网、刺绳、钢板网、冲孔网、输送带、条缝筛板、焊接护栏、折弯护栏、勾花网、草原网、铁艺护栏网等各种金属丝及丝网护栏产品。

我们拥有多种检测仪器，以保证所有的产品全部达标，我们的产品也全部通过ISO9001:2000质量管理体系。因此，我们可以为您提供优质的丝网产品和周到的服务。我们的产品远销美国，加拿大，意大利，乌克兰，东南亚，中东等数十个国家和地区。

金爵真诚希望同世界各地的所有的友好客户建立友好的合作贸易关系，通过互惠互利建立一个美好的未来。欢迎您来我公司参观！

Established in 1985, is located in Anping County, "The Hometown of Wire Mesh of China". It's an enterprise specialized in manufacturing, processing as well as trading various kinds of iron wire and wire mesh products, and owns the advanced wire-drawing, galvanizing and wire mesh weaving equipments. Its main and major products are: soft annealed iron wire; galvanized iron wire; PVC coated iron wire, Loop tie wire, thatching screws wire; "u"-shaped iron wire for reinforcing steel bars; series of stainless steel wire meshes; series of brass and red-copper wire meshes; various kinds of window screening; welded wire mesh; hexagonal wire mesh; chain link fence; galvanized square-hole wire mesh; barbed wire; PVC coated wire mesh; crimped wire mesh; expressway wire mesh fencing and other wire netting and wire cloth products.

The complete range of specifications with extremely good quality can we supply. Jinjue products are strictly examined with all necessary testing instruments, and we've also got the certificate of ISO9001:2000 Quality Management System. Therefore we can provide the high-quality wire mesh and wire cloth products and charming service. Our products are sold far to the USA, Canada, Italy, Ukraine, Southeast Asia, Middle-east etc.

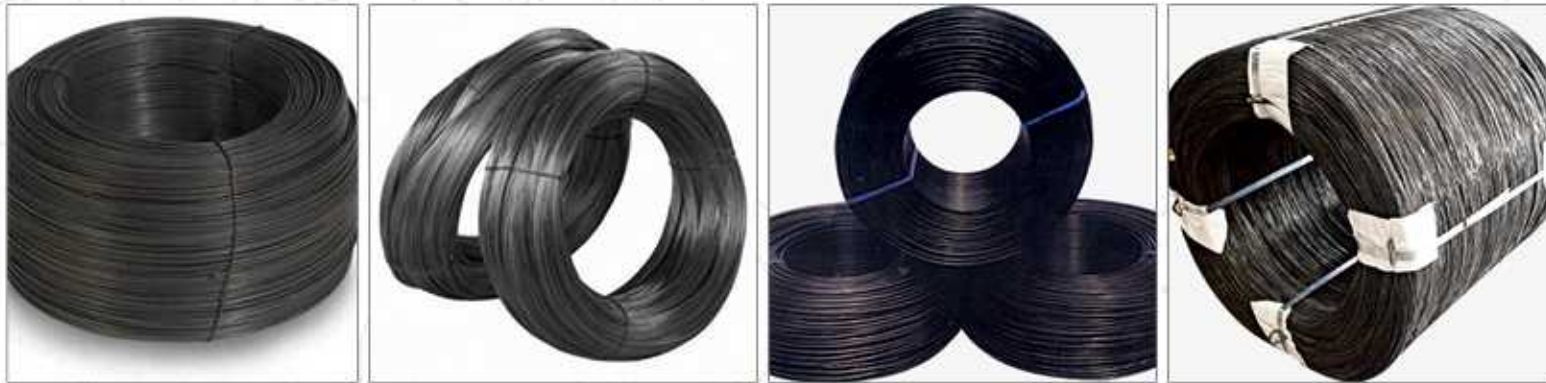

JIN JUE sincerely hopes to build up friendly trade relationship with all customers worldwide on the basis of frank and earnest cooperation, mutual benefit for a prosperous and sunny future. Welcome to visit our factory!

退火丝

ANNEALED IRON WIRE

黑色退火丝是由Q195型号盘条拉拔成的黑铁丝。比普通黑铁丝更软，柔韧性更强，柔软度均匀，色度一致。要用于建筑、矿山、化工、焊网、焊衣架、再加工等。退火后铁丝变软，柔韧度增加，做建筑绑丝、绑扎钢筋效果更佳。

Black annealed wire is made of Q195 type wire drawing, which is softer, more flexible, uniform in softness and consistent in color than ordinary black wire. It is used for reprocessing of chemical welding mesh welding hanger in construction mine. After annealing, the wire will become soft and the flexibility will increase.

合股绳

TWISTED WIRE

合股绳又名：捆绑线、合股绑丝、铁丝网。黑丝和镀锌铁丝合股。

用途：可用于高级建筑、车船捆绑、铁艺装饰、工艺品制作等广泛用途。

Twisted wire Also known as: binding wire, twisted wire, wire rope. The black wire and galvanized iron wire partnership.

USES: can be used for advanced architecture, transport binding, wrought iron decoration, arts and crafts production etc.

镀锌丝

GALVANIZED WIRE

镀锌丝采用优质低碳钢盘条加工而成，是采用优质低碳钢，经过拉拔成型、酸洗除锈、高温退火，热镀锌、冷却等工艺流程加工而成的。镀锌丝又分为热镀锌丝和冷镀锌丝（电镀锌丝）。产品广泛用于建筑、手工艺品、编制丝网、高速公路防护栏、产品包装及日常民用等各个领域。

Galvanized wire is made of high quality low carbon steel wire rod processing and into, is made of high quality low carbon steel, after drawing molding, pickling derusting, high temperature annealing cooling process such as hot dip galvanized processing of galvanized wire is divided into hot dipped galvanized wire and cold galvanized wire (electric galvanized wire) products are widely used in construction crafts prepare silk screen highway guardrail product packaging and daily civil and other fields.

不锈钢丝

STAINLESS STEEL WIRE

不锈钢丝材质：302，304，304L，316，316L等不锈钢丝。

特点：表面光亮，美观耐用，抗腐蚀，耐酸碱，耐高温，不易磨损，不易老化，韧性好，强度高。

广泛应用于编织机织丝网、轧花网、六角网、输送带、不锈钢丝网、不锈钢钢丝绳、工艺品、餐具架、烧烤网及各种编织、拧花、捆绑等多种用途。

Stainless steel wire material: 302, 304, 304L, 316, 316L stainless steel wire, etc.

Features: surface light, beautiful and durable, corrosion resistant, acid and alkali resistant, high temperature resistant, not easy to wear and tear, not easy ageing, good toughness and high strength.

Application: widely in weaving woven wire mesh, crimped wire mesh, hexagonal wire mesh, conveyor mesh belt, stainless steel wire mesh, stainless steel wire rope, arts and crafts, tableware, barbecue net flowers and various kinds of knitting, twisting, bound to wait for a variety of purposes.

切断丝 CUT WIRE

切断丝是将铁亮丝、火烧丝、电镀锌丝、涂塑铁丝、烤漆铁丝等各种金属丝，按照客户要求校直后定尺截断。

切断丝又称（截断丝）、PVC 切断丝、不锈钢切断丝、镀锌切断丝等。

产品特点：具有便于运输、使用方便的。

产品用途：广泛用于建筑行业、手工艺品、日常民用各个领域。

产品规格：8#-23#（丝径 0.6mm-4.5mm），长度不限。可根据客户具体要求，加工定做各

种特殊规格产品。

包装说明：按用户要求进行包装。

Cut off the wire is will bright silk HuoShaoSi electric galvanized iron wire plastic coated wire, etc. Various kinds of metal wire, wire of the lacquer that bake after straightening length truncation in accordance with the requirement of the customers to cut off the wire is also called the cut wire (truncated) PVC wire stainless steel cut wire galvanized wire cutting etc. Product characteristics: with facilitate transportation convenience products use: widely used in handicrafts daily civil construction industry and other fields product specifications: 23 # 8 # - (wire diameter 0.6 mm to 4.5 mm), unlimited length can according to customer's specific requirements, processing customized various kinds of special specifications of products Packing instruction: packing according to customer's requirement.

小密排丝 SMALL COIL WIRE

特点：内铁芯不易脱漆阻燃美观平折 180 度不脱漆不掉色环保。

小盘丝用于建筑绑丝，园艺捆扎，重量长度和卷径可根据客户要求生产，工作时工人带在身上方便使用，快捷，美观。小卷丝分为，镀锌小卷丝，PVC 小卷丝，退火小卷丝，镀铜小卷丝，铜丝小卷丝等。

Features: the core is not easy to paint flame retardant beautiful flat folding 180 degree not to take off the paint rub off the environmental protection.

Small coil wire used in construction to wire, gardening strapping, length and weight according to the customer request production of coil diameter, work workers bring in the body is convenient to use, fast, and beautiful. Divided into small volume silk, galvanized small coil wire, PVC wire small volume, small coil wire annealing copper plating small coil wire, copper wire small coil wire, etc.

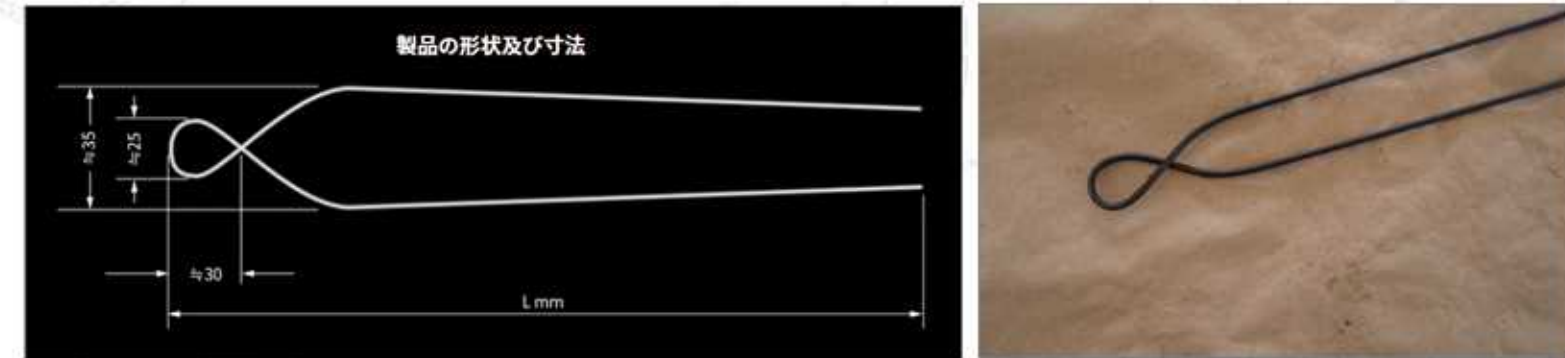

U 型丝 U TYPE WIRE

U 型丝主要用于建筑行业上螺纹钢的捆绑，其长度由用户自定。

U-shaped wire is mainly used for the binding of threaded rebar in the construction industry, and its length is determined by the user.

加工番线 PROCESSING WIRE

扣丝 LOOP WIRE

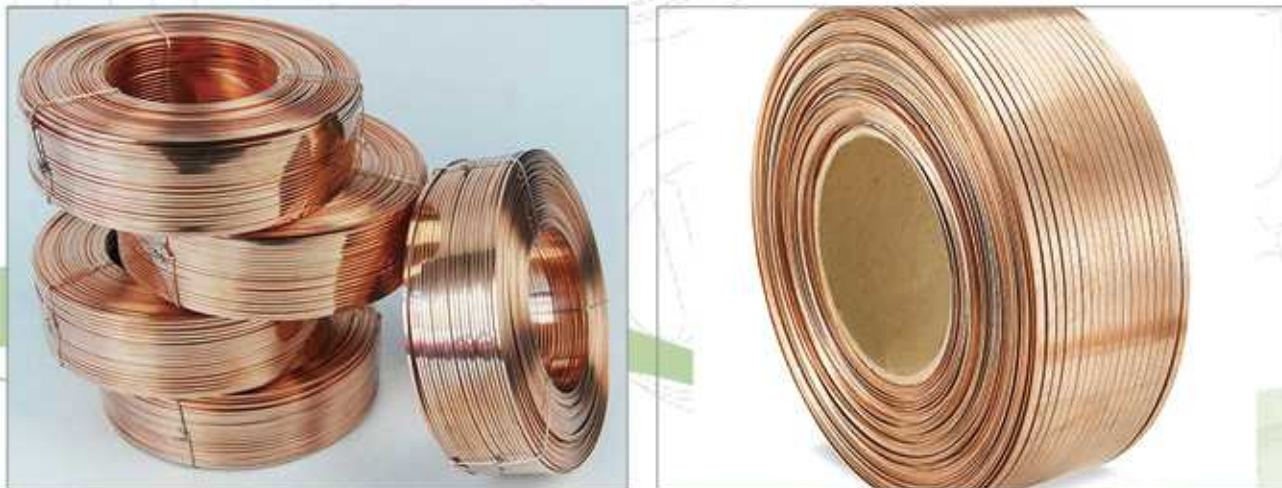

● 打包丝
BALE TIE WIRE

● 吊顶绑丝
SCREW WIRE

● 扁丝
FLAT WIRE

● 护栏网
FENCE NETTING

护栏网用于公路、铁路、飞机场、住宅小区、港口码头、花园、饲养、畜牧等的护栏防护。特点防腐、防老化、抗晒、耐候等特点。护栏网表面防腐形式有电镀、热镀、喷塑、浸塑。

经除锈、打磨、钝化、涂塑，硫化等工艺后，采用镀塑处理，色彩为果绿色，镀层厚度为0.5 ~ 0.6mm，镀粉采用抗老化性能较佳的进口耐候性树脂粉料，镀层必须颜色一致，表面光滑，不允许有流挂、滴瘤或多余结块。镀件表面应无漏镀、露铁等缺陷。

Fence for highway railway airport residential garden breeding, animal husbandry such as barrier protection characteristics of ports anticorrosive anti aging resistance to bask in weather resistance and other characteristics of fence netting surface corrosion forms have hot dip plating passivation plastic coated, plastic spraying jinsu derusting burnish vulcanization process, such as using plastic plating processing, color for fruit green, coating thickness of 0.5 ~ 0.6 mm, plating powder imported anti-aging performance better weatherability tree powder materials, the plating must be the same color, smooth surface, there is no flow hang drop of tumor or excess agglomerate should be no leakage on the surface of the plated iron and other defects.

勾花网 CHAIN LINK FENCE

材料：优质低碳钢丝、不锈钢丝、铝合金丝。

编织及特点：钩编而成；编织简洁、美观实用。

用途：用于球场、公园、河道、高速公路、铁路、机场、建筑、住宅的安全防护等。

Materials: high quality low carbon iron wire, stainless steel wire, aluminum wire.

Weaving and characteristics: crochet; Weaving simple, beautiful and practical.

Uses: used in stadiums, parks, river, highway, railway, airport, residential buildings, the safety protection, etc.

牛栏网 CATTLE FENCE

草原网：又名牛栏网。

材质：优质中碳钢丝、不锈钢丝、冷热镀锌材质。

用途：草原网主要用于牧区草原建设；可围建草原和定点放牧、分栏放牧。同时适用于农、牧专业户建立家庭养殖场。

Can Weijiar net: also known as bull bar network.

Material: High quality medium carbon steel wire, stainless steel wire, cold and hot galvanized materials.

Uses: Grassland net is mainly used for grassland construction; Can Weijian grazing grassland and fixed-point grazing, columns. Applies to both, animal husbandry profession of establishing family farms.

电焊网 WELDED WIRE MESH

材料：选用优质低碳钢丝、不锈钢丝。

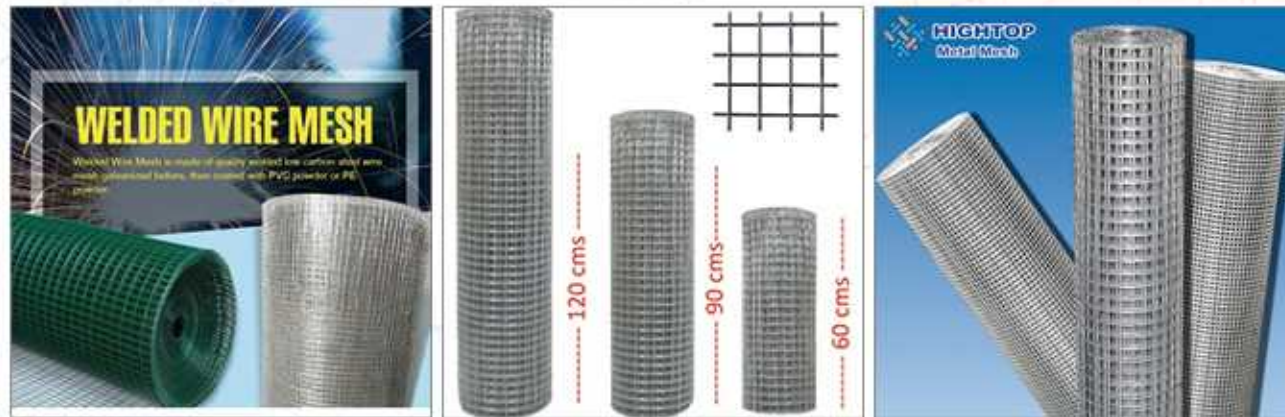

焊接及特点：分先焊后镀、先镀后焊；具有极强的防腐抗氧化等特点。

用途：广泛用于工业、农业、建筑、交通运输、采矿、球场、草坪、养殖等各行业的围栏、装饰、机械防护等。

Material selection: High quality low carbon steel wire, stainless steel wire.

Welding and features: Galvanized after welding, welding after galvanized; With a strong anticorrosion oxidation, etc.

Uses: widely used in industry, agriculture, construction, transportation, mining, the ball Field, lawn, cultivation and other industries fence, decoration, mechanical protection, etc.

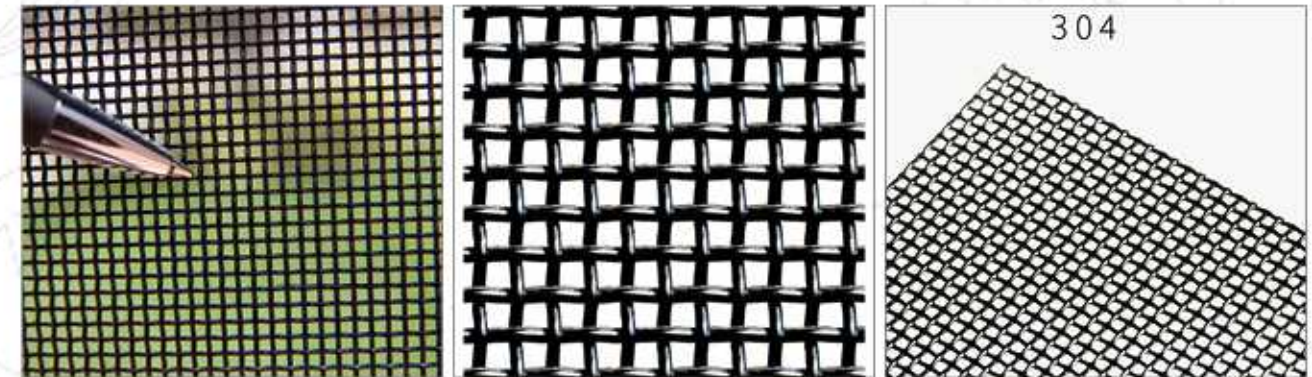

金刚网 DIAMOND MESH

金刚网窗纱选用不锈钢丝外表防护采取静电喷涂处理具有很高的防锈，防破坏能力，经检，抗冲击能力达 2.148 吨，抗剪，抗破坏能力更强。

产品特点：网面平整，目数标准，经纬度弯曲一致，其显著特点是像铁板一样坚硬板实，是防偷盗、防弹、居家办公场所安全防护的首选。

Diamond mesh wire netting selects the stainless steel wire surface protection the electrostatic spraying treatment has the very high rust, damage resistant ability, JingJian, impact resistance of 2.148 tons, shearing, stronger ability to resist damage.

Product features: smooth surface, mesh number of standard, latitude and longitude curve is consistent, its salient features are BanShi hard like iron, is against theft, bulletproof, home of choice for workplace safety protection.

刀片刺绳 / 普通刺绳

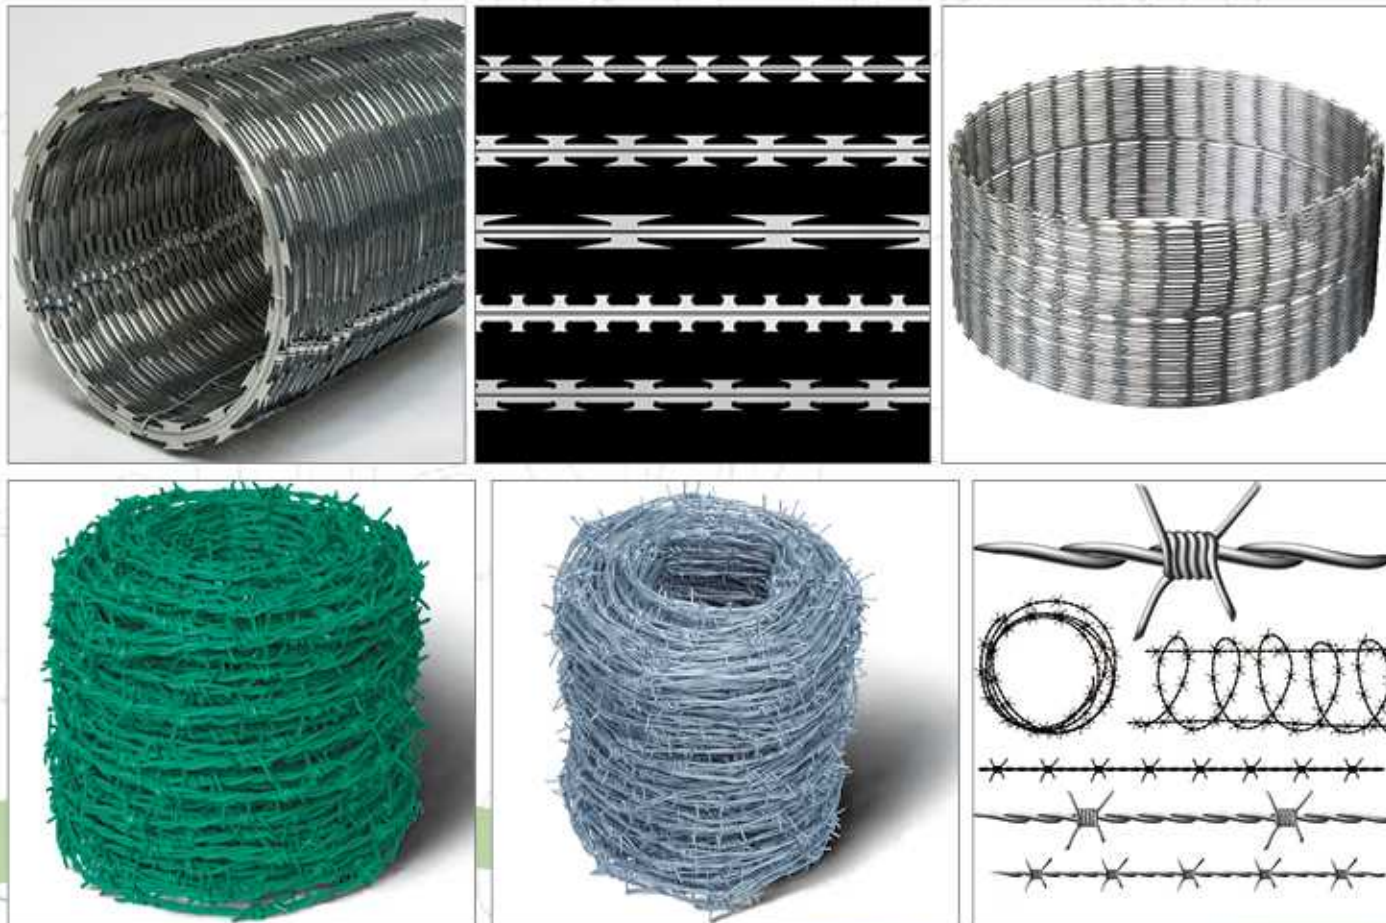

RAZOR BARBED WIRE / BARBED WIRE

它是一种现代安全围栏材料更好的保护和击剑强度由热浸镀锌钢板或不锈钢。美丽和锋利的刀片和强心线，铁丝网的功能安全的击剑，安装方便、年龄阻力和其他属性。

刀片刺绳是广泛应用于高档住宅小区、仓库、监狱和在军事领域及其他网站要求严重击剑和安全。铁丝网可以分为直接式铁丝网，形成线圈，根据安装交叉型和扁平型模型。

Razor wire is also named concertina coils or razor type barbed wire. It is a kind of modern security fencing materials with better protection and fencing strength made of hot-dipped galvanized steel sheets or stainless steel sheets. With beautiful and sharp blades and strong core wire, razor wire has the features of secure fencing, easy installation, age resistance and other properties.

Razor type barbed wire is widely used in high-grade residence district, warehouses, prisons and in military fields and other sites requiring severe fencing and security. Razor wire can be classified into straight type razor wire, concertina coils, crossed type and flat type according to the installation models.

钢筋网

STEEL MESH

名称：钢筋网

材质：低、中碳钢

用途：公路、桥梁、隧道、建筑等

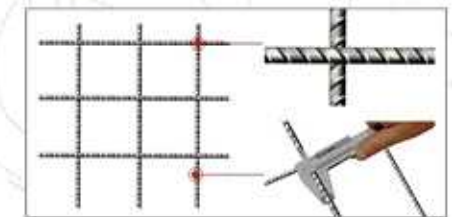

特点：提高钢筋工程质量、施工速度，增强混凝土抗裂能力。

Name: steel mesh

Material: low and medium carbon steel

USES: highway, bridge, tunnel, construction, etc

Features: improve the quality of reinforcement engineering, construction speed, enhance the crack resistance of concrete

轧花网 / 编织网

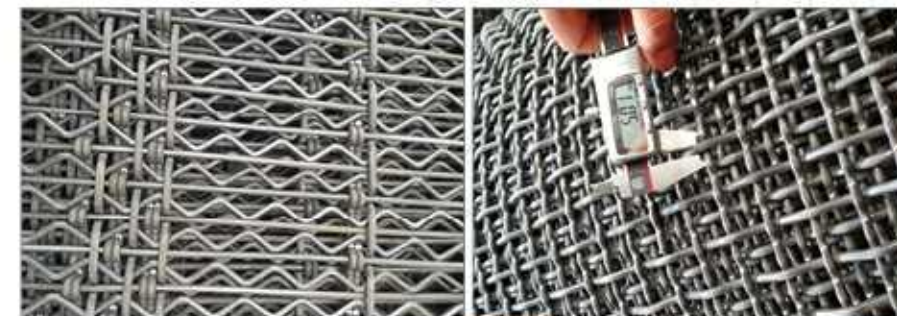

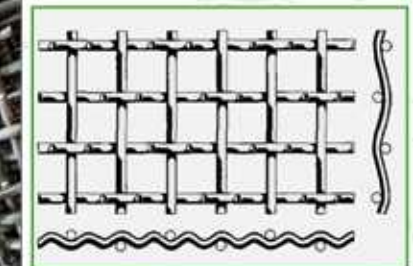

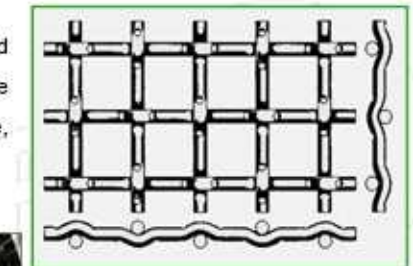

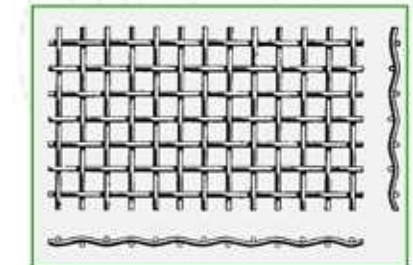

CRIMPED WIRE MESH / WOVEN MESH

材质：低、中、高碳钢丝、不锈钢丝、铜丝、铝丝

编织方式及特点：先压弯后编织，结构牢固、美观

用途：矿山、机械防护、建筑、装饰、场地围栏、住宅防护等。

Material: low, medium and high carbon steel wire, stainless steel wire, copper wire and aluminum wire weaving method and characteristics: first bend and then weave, the structure is firm and beautiful use: mine machinery protection, construction decoration, enclosure, housing protection, etc

六角网 HEXAGONAL MESH

材料：选用优质低碳钢丝、不锈钢丝等。

用途：多用于建筑、石油、化工、养殖、园林防护、食品加工等行业的加固、防护及保温等；如制做网箱、石笼、隔离网墙、锅炉罩、家禽围栏等。

Material: choose high quality low carbon steel wire, stainless steel wire, etc.

Uses: used in construction, petroleum, chemical industry, farming, landscape protection, food processing industries such as reinforcement, protection and heat preservation, etc.; Such as making the cages, stone cage, isolation wall, boiler cover, poultry fence and so on.

石笼网 GABION MESH

包塑丝、镀锌丝石笼网可用做水库截流用的乱石网箱，同时也是优良的建筑材料，广泛用于高速公路、铁路护栏网、绿化栏网、山坡网箱、抗洪网箱、护堤栏网、动物园栏网、井巷防护网等，并可提高河床边坡的稳固性，保护河床防止冲刷，在邻近环境水源的保持上，有控制水流量，防止水资源流失的作用以及生态环境的保护与治理。

Plastic coated wire, galvanized wire stone cage wire mesh, is not only used as the stone net cage, but also as the high quality construction materials. Widely used in highways, railways, greening fence hillside net cage, flood fighting net cage, revet fence, zoo fence, well and alley fence etc. Meanwhile it can improve the stability of hillside, preventing the riverbed from washing out. On the maintenance of neighborhood environment and waterhead, it also have the effect of controlling the flowing quantity, preventing the watersource from flowing, protecting and governing the zoology environment.

不锈钢窗纱 WINDOW SCREENING

不锈钢窗纱采用平织工艺织造，具有良好的透气、透光等性能，是目前我国普通尼龙窗纱的替代产品，该产品档次高，用途广，是高档写字楼、住宅及各种建筑、畜牧场、果园等门窗首选的防护产品。

透气、透光，本产品表面色泽光亮美观，于普通尼龙窗纱相比可更好的增加空气流通率和阳光的光线照射。

Stainless steel window screening using plain weave weaving process, has the good properties, such as ventilation pervious to light, is at present our country ordinary nylon window screening of alternative products, the product high grade, wide application, it is a high grade office building housing and all kinds of building doors and Windows of livestock farm orchard preferred protection product ventilation pervious to light, colour and lustre is bright beautiful, this product surface than in ordinary nylon window screening can be better to increase air circulation rate and the light of the sun.

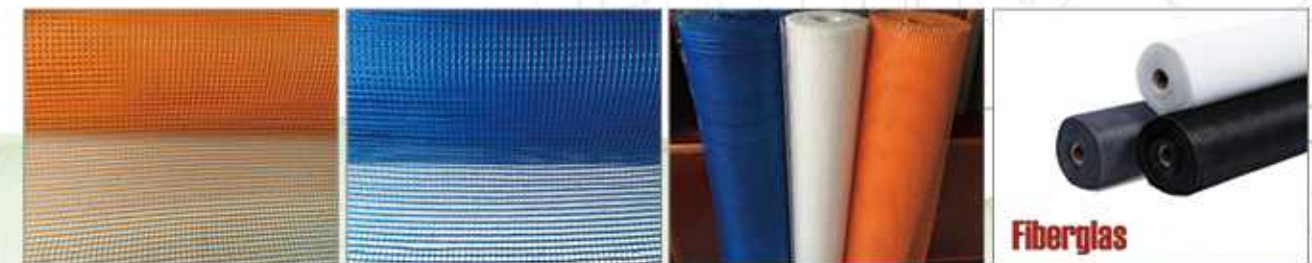

玻纤窗纱 FIBERGLASS ALKALINE-RESISTANCE MESH

材质是玻璃纤维、PVC 组成。编织及工艺是采用玻璃纤维单丝涂塑工艺，平织，加热，定型而成。

使用寿命长：耐气候性能好，具有抗老化、抗严寒、抗炎热、抗干燥抗潮湿、阻燃、抗潮湿、防静电、透光好、不霉丝、不变形、抗紫外线、拉力强度大、使用寿命长等优点。造型美观、结构严谨。整个窗纱采用玻璃纤维单丝涂塑平织纱制成，其余的材料全部采用 PVC 塑料一次压制完成，分体装配，解决了传统纱窗与窗框之间缝隙太大，封闭不严的问题，使用起来安全美观且密封效果好。

Of PVC material is glass fiber woven and process is to use glass fiber monofilament plastic coated process, plain weave, heating, finalize the design and long service life, good weather resistance, anti-aging antioxidants cold heat resistance against dry humidity resistant flame retardant anti-humidity anti-static good pervious to light do not leap into silk deformation anti-uv tensile strength advantages of long service life aesthetically pleasing structures The whole window screen is made of glass fiber monofilaments coated plain woven yarn, and the rest of the materials are all made of PVC plastic and pressed at one time. The separate assembly solves the problem that the gap between the traditional window screen and window frame is too big and the sealing is not strict. It is safe and beautiful and has good sealing effect.

● 不锈钢网 STAINLESS STEEL WIRE MESH

材料:SUS302、304、304L、316、316L的不锈钢丝。

编织及特点:平织、斜织、竹花编织而成,具有耐酸、耐碱、耐高温、耐磨等性能。

用途:用于矿业、石油、化工、食品、医药、机械制造等行业。

Material :SUS302, 304, 304L, 316, 316L stainless steel wire weaving and its features: flat weave, oblique weave, bamboo flower weaving, acid resistance, alkali resistance, temperature resistance, abrasion resistance, etc

● 铜网 WEFT WIRE

名称:铜网

材质:黄铜、紫铜、磷铜

编织方式:平织、斜织、席型

用途及特点:矿山、冶金、建筑、药材等液体、气体、粉末过滤,有耐磨、无磁、防辐射等。

Copper mesh material: brass copper phosphorus copper braid: flat woven oblique woven mat type use and characteristics: mineral metallurgy construction medicine and other liquid gas powder filtration, wear-resistant no magnetic radiation, etc.

● 冲孔网 PERFORATED MESH

材料:不锈钢、铝、碳钢、铜、镍、钛等。

用途:采矿、机械、食品、体育用品、厨房供应、消音器、装饰、建筑、电子、交通工具。

Material: Stainless steel, aluminum, carbon steel, copper, nickel, titanium etc.

Purpose: Mining, machinery, food, sports supplies, kitchen supplies, silencer, decorative, construction, electronics and transportation.

● 钢板网 EXPANDED MESH

材料:铝板、薄低碳钢板、不锈钢板、铝镁合金板、铜板、镍板。

用途:广泛用于公路、铁路、农用建筑、水利等建设;各种机械、电器、窗户的防护及水产养殖等。

Materials: Aluminium plate, thin low carbon steel plate, Aluminum magnesium alloy plate, copper plate, nickel plate.

Uses: Widely used in highway, railway, agricultural construction, water conservancy and other construction; The protecting of all kinds of machinery, electrical equipment, window and aquatic products breeding, etc.

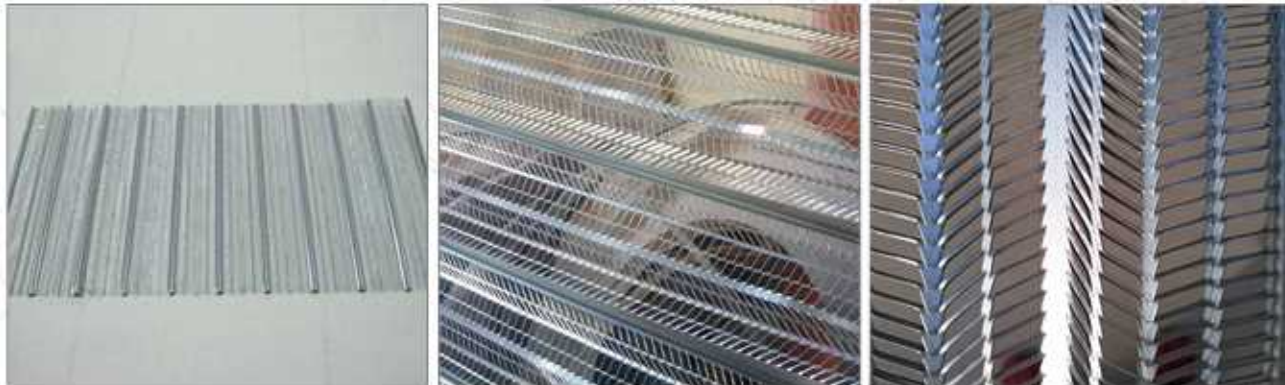

模板网

FAST-RIBBED FORMWORK

有筋网

RIB LATH

护角网

ANGEL BEAD

输送带网

CONVEYER BELT MESH

材料：不锈钢丝、不锈铁丝、中低碳钢丝、镀锌铁丝、镍铬丝、铁铬、铝丝、聚酯丝等。

用途：广泛用于石油、冶金、食品加工机械、制药、玻璃、印制线路板专用设备等行业。

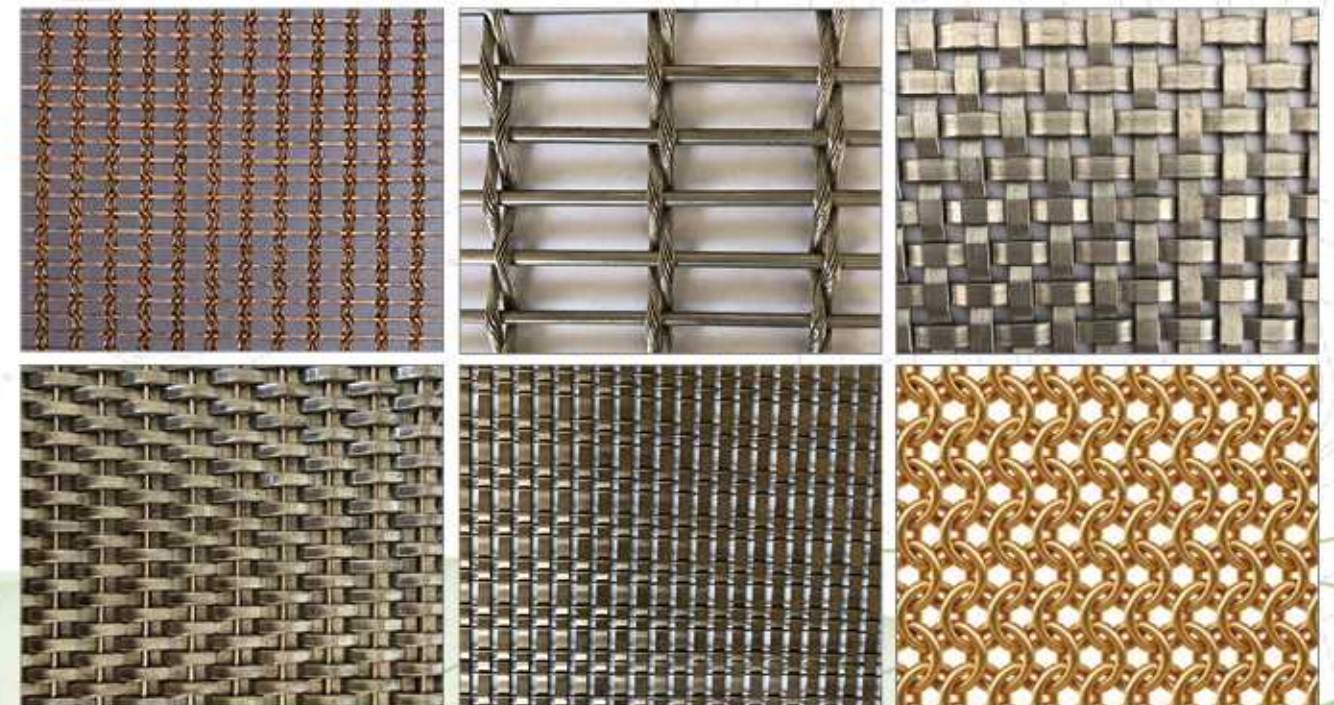

Material: Stainless steel wire, stainless iron wire, low carbon steel wire, galvanized iron wire, nickel, iron chromium, aluminum wire, polyester wire, etc.

Uses: Used wide in oil, metallurgy machine of food processing, glass, printed circuit board is installed with equipment and other industries.

装饰网

DECORATIVE MESH

钢格板 STEEL GRATE

材料：低碳钢、不锈钢。

表面处理：热浸镀锌。

尺寸：3x20,3x24,3x30,1000mmx1000mm,

1000mmx5800mm,1000mmx6000mm。

用途：工业平台地板和通道、交通、钢结构。

Material:Low carbon steel,stainless steel.

Surface Treatment:Hot-dip galvanized.

Size:3x20,3x24,3x30,1000mmx1000mm,

1000mmx5800mm,1000mmx6000mm.

Application:Industrial platform flooring and walkway,traffic,steel structure.

矿筛网 ORE SCREEN MESH

是一种用于筛分过滤的金属网状结构元件。应用于筛分、过滤、脱水、脱泥等作业。它具有很高的强度、刚度和承载能力，可以做成各种形状的刚性的筛分过滤装置。易渗漏、耐磨、耐腐蚀。网丝断面为梯形，缝隙上窄下宽。是一种用于筛分过滤的金属网状结构元件。矿筛网有聚氨酯筛网、锰钢矿筛网、不锈钢矿筛网。

Is a kind of metal mesh structure used in sieving filter element is applied to filter sieve desliming dehydration and it has high bearing capacity, stiffness and strength can make all kinds of the shape of the rigid screening filter easy leakage wear-resisting corrosion resistance mesh cross section is trapezoidal, narrow gap on the wide is a kind of used for screening filter metal ore screen mesh structure component polyurethane screen mesh manganese steel ore screen mesh of stainless steel screen mesh.

钉子系列（普通钉 / 瓦楞钉 / U型钉 / 油毡钉） NAIL SERIES

钉子因用途众多而有着不同的形状，最常见的钉子被称为“铁丝钉”，另外常见的钉子名称还有大头钉，图钉或曲头钉。

种类：纹钉、钢排钉、码钉、水泥钢钉、木螺钉、麻花钉、拼钉。

Nails have different shapes for use,the most common nails are called "wire nails."and other common nails are name and nail pins, pins or brads.

Type: nails, steel nails, code nail, cement nail, wood screw, twist nail, nail fight .

丝网深加工（丝网片 / 过滤筐 / 过滤桶） DEEP PROCESSING OF SILK SCREEN
