How to brand?(1)

1. Silk printing
It is also called as "silk print" which is the most established method to brand onto objects with multicolor symbol. Logo artwork for products with this symbol should be uploaded in a vector format such as .eps, ai, or.cdr. The pantone code for each color should be indicated also. Fonts should be converted to outlines and all colors 'solid', rather than in tones or shades. So, you could get what you see.

2.Full color printing/Transfer printing
It is to show the product can be branded in full color with a quality resin dome finish. Logo Artwork should be hi resolution and 300dpi. You can upload files as .png, jpeg or .gif formats. Low resolution image files lifted from websites will **not** give good results. It should be the first choice when there is large size to print and you'd like to have true to life full-color image.

TOLEDA Value-added service(Smart Band)

Software Customized:

We can offer SDK for customize the App(Application)with the name, logo or interface you desired. We could supply the custom app if customer don't have it. The data from users' activity could be upload to server for review and monitor. For some fitness club customers, We could support RFID technology to add a chips inside of bracelet, Users could wear it while doing sports also as a access key to each rooms or key to own cabinet. Here are some examples of files our customers have asked us to d0 in the past:

- App functions customized, Own app connection with band
- Upload the users activity data to server
- Under same function with different UI
- Vibration frequency adjustment
- RFID Technology

Auto-run Function:

Our Smart Band support a function known as 'AutoRun', something which most standard off the shelf flash drives do not offer. This feature allows your logo appeared on band screen display when you starting the band on. To reinforce your company logo to users.

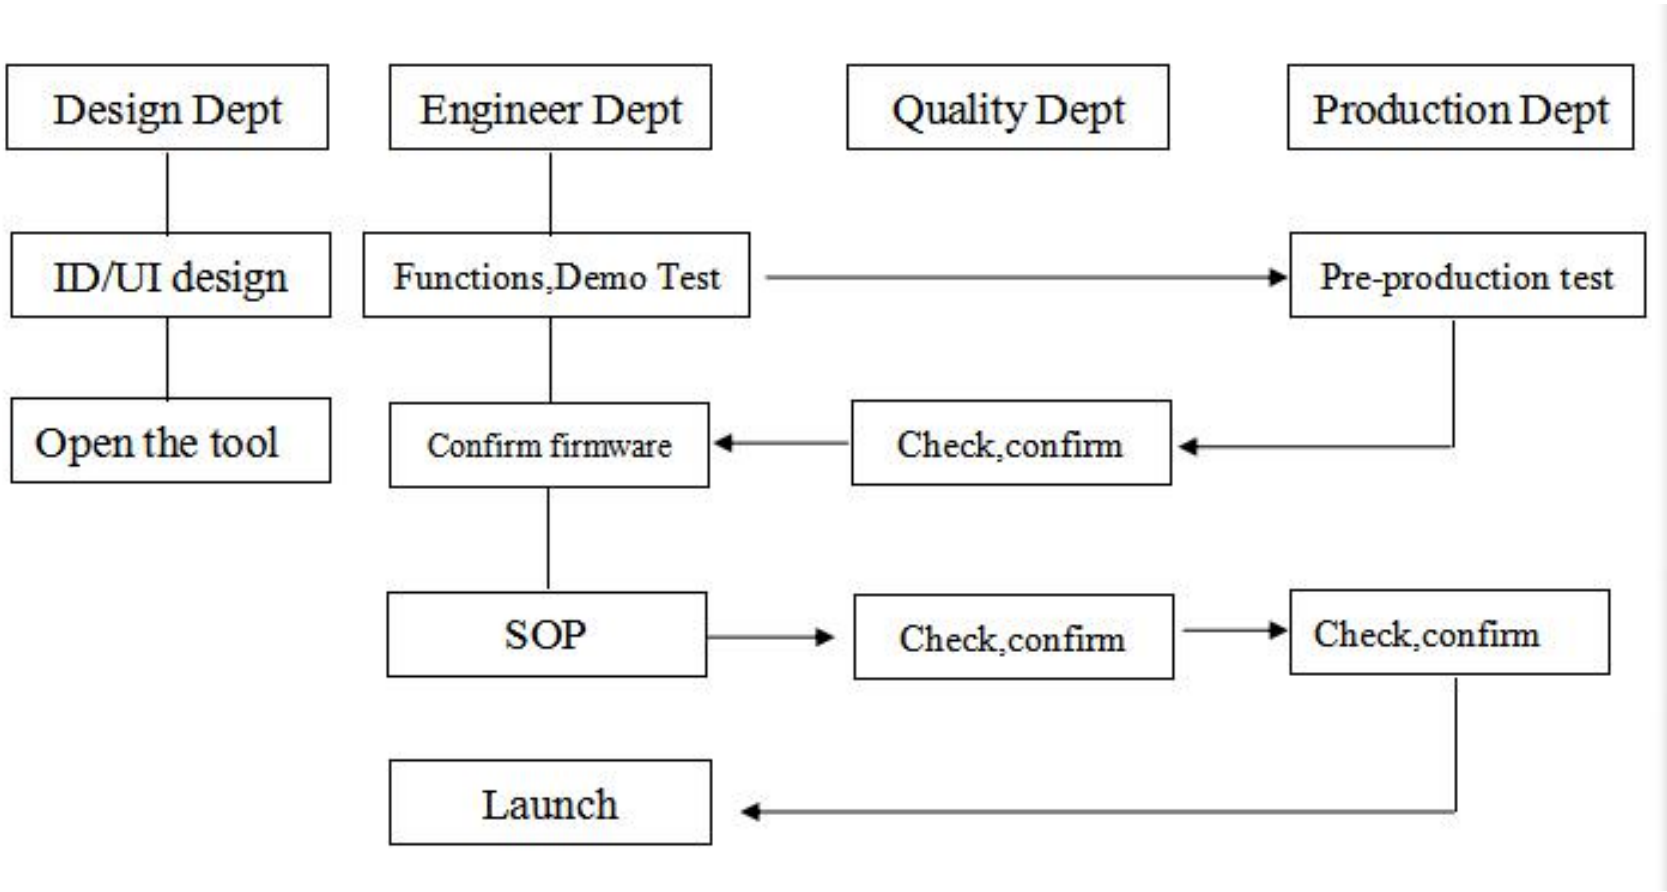

Hardware customized:

We could make the vibration more stronger 30% than normal if customer want. And the LED light color could be changed as well. Here are some examples of our customers have asked us to do in the past:

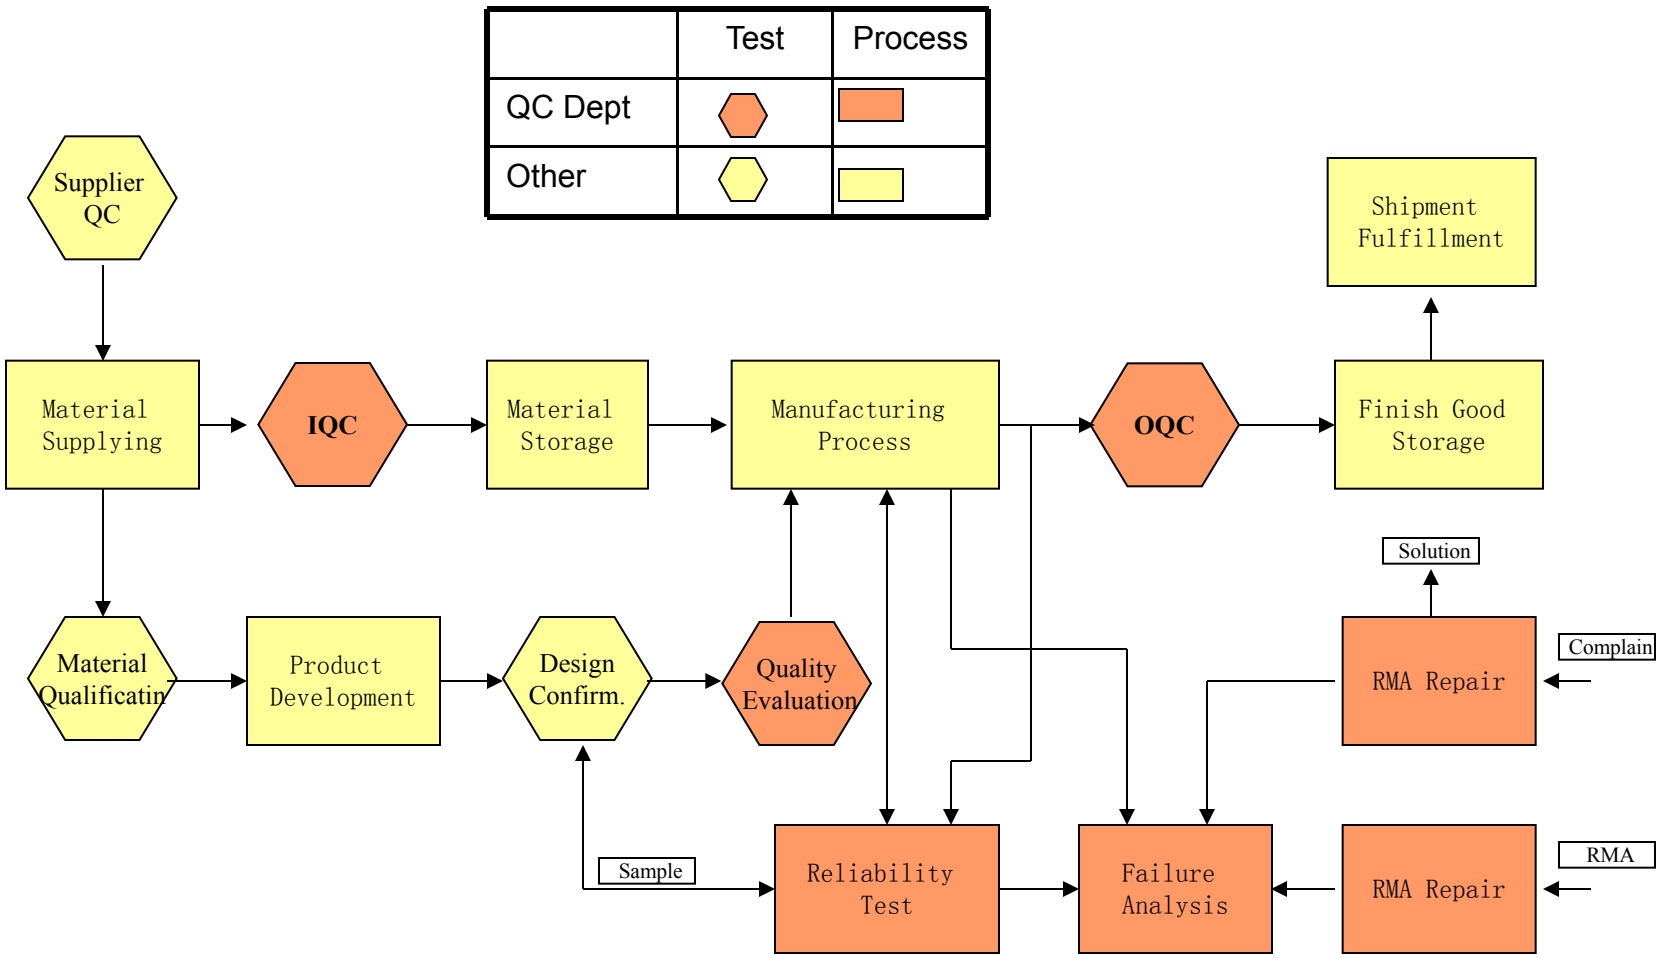

- Vibration strength
- Band with own design
- Band with other material
