

Company Introduction

Established in the year of 2008 in Dongguan Hengli for the production of in-car audio product, We have our own factory with 20000m². For these years with the full support of our valuable customers and the immersed in work of our teams, we have now built-up with 12 production lines and 7 SMT lines for a monthly capacity of 150,000 units on OEM/ODM production. Flysonic is now become a leading manufacture and exporter of automotive audio/video products. Our R&D; engineering; quality control & production teams provided the strong service to all our customers in every aspect. We are confident to supply quality product at the most competitive prices.

R&D

System Integration Technology

- Media player, navigation, operation system, various peripherals connection and control.

Navigation Technology

- Beidou navigation, high fix, integrated navigation and realistic navigation.

Image Processing Technology

- Image analysis, image understanding, image enhancement and image intelligent information processing.

Audio Processing Technology

- Spatializer, production result and digital amplifier.
