Peptide Product Corporate Brochure | Full-Spectrum Small Molecule Active Peptide Product Manual

Preface | A New Era of Health Empowered by Peptide Technology

With the comprehensive upgrading of national health consumption, refined, efficient and safe health maintenance concepts have gained widespread popularity. As a core achievement in the field of biotechnology, small molecule active peptides have subverted the traditional health preservation model with the core advantages of **high absorption, high activity, zero burden and full adaptability**, becoming a golden track in the big health industry.

Our company focuses on the whole industrial chain of R&D, production and sales of active peptides. Relying on cutting-edge biological enzymatic hydrolysis technology, strict production standards and professional scientific research teams, we develop a full range of high-quality peptide health products covering multiple scenarios such as oral health preservation, skin anti-aging, physical conditioning and daily health care. This brochure comprehensively displays our corporate strength, product system, core advantages and cooperative value, sincerely inviting global partners to win-win the trillion-dollar big health market.

I. Company Profile | Focus on Peptide Technology, Deeply Cultivate Big Health Industry

1.1 Corporate Strength

We are a modern high-tech health enterprise integrating **biological R&D, raw material extraction, product processing, brand operation and channel empowerment**. With years of in-depth focus on small molecule active peptides, we own independent R&D laboratories, standardized GMP production workshops and a complete quality inspection system. From raw material screening, production extraction and finished product testing to outbound traceability, every link is strictly controlled to ensure the high quality, safety and effectiveness of each product.

Adhering to the development philosophy of "Empower Health with Technology, Forge Quality with Craftsmanship", our company continuously iterates and upgrades peptide technology. We have established long-term strategic cooperative relations with many domestic biological research universities, continuously overcoming core technical problems such as peptide

purification, activity retention and formula compounding, and owning a number of patented technologies and product formulas, maintaining a leading position in the industry.

1.2 Brand Philosophy

Brand Mission: To provide efficient, safe and high-end health maintenance solutions for the public with cutting-edge peptide biotechnology

Brand Vision: To become a publicly trusted active peptide health brand and lead the new trend of scientific health preservation

Core Values: Science and technology oriented, quality rooted, integrity based, win-win oriented

II. Core Technology | Core Advantages of Peptides, Revolutionizing Traditional Health Preservation

2.1 What are Small Molecule Active Peptides?

Peptides are small molecular active substances between amino acids and proteins, and the core basic substances of human life activities. Adopting **patented low-temperature biological enzymatic hydrolysis technology**, our company extracts high-activity small molecule peptides from natural animal and plant raw materials with molecular weight precisely controlled in the optimal absorption range, perfectly solving the pain points of slow absorption, low utilization rate and heavy gastrointestinal burden of traditional proteins and health products.

2.2 Eight Core Product Advantages

- **Rapid Absorption, Direct Action on Body Tissues**: The small molecular structure eliminates the need for secondary gastrointestinal decomposition, which can be quickly absorbed and utilized by the human body directly. The absorption rate is far higher than that of ordinary proteins and traditional health products, efficiently supplementing body nutrients.
- **High Activity & High Purity**: The low-temperature extraction process retains the original activity of peptide substances, removes impurities and invalid components, with high purity and strong activity, bringing more obvious conditioning effects.
- **Natural Raw Materials, Safe & Pure**: Carefully selected high-quality natural animal and plant raw materials, free of hormones, preservatives, heavy metals and artificial additives, mild and safe for all ages.
- **Precise Molecules, Targeted Conditioning**: It accurately acts on core dimensions such as human cell repair, metabolism regulation and immunity improvement, targeted improving sub-health problems.

- **Zero Gastrointestinal Burden**: With excellent water solubility and mild non-irritating properties, it is suitable for people with weak spleen and stomach and poor absorption capacity.
- **Scientific Formula & Multi-dimensional Compounding**: Combining traditional health preservation theories with modern biotechnology, a variety of peptides are scientifically compounded with rare nutritional ingredients to achieve a superposition of health effects.
- **Whole-process Traceability & Controllable Quality**: Each batch of products undergoes multiple inspections including microbial detection, heavy metal detection and active ingredient detection, with one-item-one-code traceability for full quality supervision.
- **Diversified Forms & Wide Application Scenarios**: Multiple dosage forms including powder, oral liquid and tablet are available, suitable for full scenarios such as daily health preservation, postoperative conditioning, anti-aging maintenance and family health care.

III. Full-spectrum Product System | Full-scenario Health Peptide Solutions

3.1 Health Conditioning Peptides (Daily Essential Products)

Core Products: Collagen Peptide, Soybean Oligopeptide, Bovine Bone Collagen Peptide, Sea Cucumber Peptide, Oyster Peptide, Walnut Peptide

Product Efficacy: Focus on basic physical conditioning, immunity enhancement, physical recovery, qi and blood regulation, gastrointestinal maintenance and bone nourishment. It can effectively improve sub-health problems such as fatigue, listlessness, low immunity, slow metabolism, osteoporosis and weak gastrointestinal function, suitable for long-term daily health care of office workers, middle-aged and elderly people, and weak groups.

Product Dosage Forms: Portable powder and concentrated oral liquid with independent sachet packaging, clean, hygienic, easy to carry, quick to dissolve and refreshing in taste.

3.2 Anti-aging & Skin Care Peptides (Best-sellers for Women)

Core Products: Fish Collagen Peptide, Elastin Peptide, Bird's Nest Peptide, Hyaluronic Acid Peptide Compound Drink

Product Efficacy: Targetedly repair skin cells, supplement skin collagen, fade fine lines and dry lines, tighten skin, brighten dull complexion, improve skin relaxation and dry roughness. Meanwhile, it regulates endocrine, improves facial complexion and delays body aging, realizing natural and beautiful skin from inside to outside.

Target Users: Women aged 20+, night owls, people with aging and loose skin, dull complexion and obvious early aging symptoms.

3.3 Physical Function Conditioning Peptides (Precision Conditioning Products)

Core Products: Liver Protection Peptide, Sleep Peptide, Metabolism Peptide, Immune Compound Peptide

Product Efficacy: Targetedly improve common sub-health problems of modern urban people. It protects the liver and detoxifies, relieves liver damage caused by staying up late; calms nerves and improves insomnia, dreaminess and poor sleep quality; regulates metabolism to improve dampness and body obesity; strengthens immune system and physical resistance, perfectly suitable for modern people with high pressure, irregular work and rest, sedentary lifestyle and unhealthy diet.

3.4 Nutritional Peptides for Children & Adolescents (Family Essential Products)

Core Products: Small Molecule Whey Peptide, Probiotic Compound Peptide, Growth Nutritional Peptide

Product Efficacy: Gently supplement high-quality active nutrients required for children's growth, promote gastrointestinal digestion and absorption, improve picky eating and partial eclipse, enhance children's immunity and support healthy growth. With small molecules and zero burden, it is specially developed for children's delicate physique.

IV. Applicable Crowds & Usage Scenarios

- **High-pressure Office Workers**: Relieve fatigue, improve memory loss and metabolic disorders caused by long-term sitting and staying up late, quickly restore physical strength and adjust physical status for daily health maintenance.
- **Female Anti-aging Groups**: Improve early skin aging, dullness, relaxation and poor complexion, realize internal conditioning and external skin care for firming, anti-aging and brightening effects.
- **Middle-aged & Elderly Health Care Groups**: Improve declined immunity, fragile bones, weak gastrointestinal function and degraded physical functions, strengthen physical fitness and delay aging through long-term health care.
- **Postoperative & Weak Groups**: Quickly supplement nutrients for people with physical weakness, poor absorption and slow recovery to assist physical rehabilitation.
- **Children & Adolescents**: Safely supplement nutrition for picky eaters and groups with weak resistance and poor digestion to support healthy growth.
- **Family Daily Health Care**: Suitable for all family members, serving as a scientific, efficient and safe substitute for traditional health products for family health maintenance.

V. Quality Assurance | Strict Standards for Reliable Safety

- **Strict Raw Material Selection**: Globally select high-quality natural raw materials, control quality from the source and eliminate inferior and polluted raw materials.
- **Patented Technology**: Adopt patented low-temperature biological enzymatic hydrolysis technology to retain peptide activity to the maximum extent and ensure core product efficacy.
- **Standardized Production**: Produced in GMP 100,000-class clean workshops with full aseptic operation, complying with national food safety production standards.
- **Multiple Quality Inspections**: Each batch of products passes microbial detection, heavy metal detection, active ingredient detection and safety detection before market launch.
- **Authoritative Certification**: The products have obtained multiple quality inspection reports and food operation qualifications with full compliance and high market recognition.

VI. Cooperation Advantages | Win-win Cooperation & Terminal Empowerment

We open up diversified cooperation modes including national investment promotion, OEM/ODM processing and channel supply, providing all-round support for partners with zero threshold, high profit margin and strong empowerment to help you easily explore the big health market.

6.1 Core Cooperation Support

- **Product Empowerment**: Full range of best-selling product matrix with high repurchase rate, wide audience and off-season free, possessing strong market competitiveness.
- **Price Empowerment**: Direct supply from the source factory without middlemen difference, with ultra-high profit margin to guarantee terminal revenue.
- **Material Empowerment**: Provide free full set of promotional materials including brochures, posters, copywriting and short videos.
- **Training Empowerment**: Free all-round training covering product knowledge, sales skills, community operation and terminal customer development.
- **After-sales Empowerment**: Professional after-sales team provides one-on-one service to answer questions and solve all terminal problems throughout the process.
- **Customization Empowerment**: Support OEM/ODM private customization, formula customization and packaging customization to build exclusive brands.

VII. Corporate Vision & Cooperation Invitation

The big health industry has become a golden industry for the next decade. As an upgraded product of health preservation, active peptides have unlimited market potential with

irreplaceable product advantages. Adhering to quality as the core, technology as the driving force and win-win as the goal, our company builds a low-risk and high-return entrepreneurship platform for all partners relying on a complete industrial chain, high-quality product system and all-round support policies.

We sincerely invite national distributors, physical stores, e-commerce teams, entrepreneurs and brand owners to cooperate hand in hand, share the trillion-dollar dividend of the big health industry, empower national health with peptide technology and create a new future of wealth together!
