Multifunctional Kids Learning Tablet 2-in-1 Drawing Board

The Story Behind 2-in-1 Learning Pad : Where Curiosity Meets Innovation

In the course of a child's early education, We noticed how traditional learning tools often failed to hold children's attention, while screen-based devices distracted them with mindless entertainment. Determined to bridge this gap, she envisioned a device that could merge structured education with creative freedom—a tool that felt like play but nurtured foundational skills.

To create a dual-purpose device that adapts to a child's evolving needs. Meanwhile, the writing tablet mode addressed Children frustration with paper waste and limited drawing surfaces during travel. The 10.5-inch LCD screen with instant-erase functionality became a sustainable solution.

The 2-in-1 Learning Pad is an intelligent kids learning machine designed to make education fun and engaging. Perfect for children aged 2-8, this educational machine combines a kids laptop learning machine with a writing tablet learning machine, offering endless opportunities for creativity and skill-building.

Design 8 Cartoon LCD Handwriting Boards

As a parent, from the moment your child is born, you want to give your child the best gifts in the whole world, including names, clothes, food, toys, etc. This is the most basic love parents give to their children. Apart from these materialistic aspects of love, I believe many parents know that the best gift for their children is companionship.

This handwriting board is designed to cure dolls' scribbles, a worry-free gift for parents. Made of ABS material, it is environmentally safe, with a variety of shapes, cute and interesting, and the soft rubber design of the head ear, Q soft touch, feel free to knead, venting and relieving stress.

Suitable for writing arithmetic and drawing as a family gift, school teaching and office note-taking.

No dust and no ink writing and drawing, no dirty hands and no dirty clothes, no more worrying about your child scribbling on the table, wall or hands! No more worrying about your child scribbling on the table, walls or hands!
