ABOUT US

- Qike(Jinhua) Robot Technology Co., Ltd. (hereafter Chic), a Jinhua, China born and raised corporation who emerged from the global field of self-balancing hoverboard with a few years growth and accumulation of experience from the birth 2014 to 2017, simultaneously being one of the presidents of the administrative committee, Hoverboard Branch, CCCME, as well as a core author of the China national standard to hoverboard.

Enterprise honor

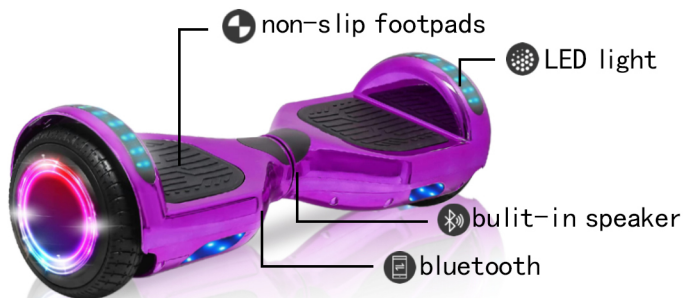

- Since the team organized in 2009, Chic's persistence of independent R&D enabled Chic's success, that on August, 2014, the first generation of Chic's self-balancing hoverboard was launched at Suning.com.

Enterprise advantage

- With the continual and huge investments of funds on R&D, Chic who has built an intellectual property portfolio system domestically and overseas, protecting the intellectual properties such as products, patents, and trademarks has been a enterprise with the complete intellectual property system and durable R&D ability, also a holder of 600+ patents and 120+ trademarks over the world, annually gaining ¥60,000,000+ through the patent authorizations.
