Improvement Plans

Engineering	Implement integrated product development to improve the efficiency of project management, to ensure the whole procedure is under control and can be foreseen. Recruit experienced engineer to improve our competitiveness Keep learning up to date technology then apply to our product lines
Professional	Have internal review meeting weekly, always keep partners informed of the schedule, notify them in advance if schedule has to be postponed.
Quality	Standardize our quality control system, make sure all inbound material and outbound goods are QC checked and approved Implement PDCA procedure
Cost	Learn advanced process measurements (IE), optimize our production process, improve our working efficiency and always manage and coordinate with supply chain to lower down cost together
