

# Sweep away the competition with our robotic vacuum cleaners

From the creators of one of mainland China's first  
automatic vacuum cleaners

Robotic vacuum cleaner (D6)

In 2005, we became one of the first manufacturers in mainland China to release an automatic vacuum cleaner. Now, you can benefit from the prowess of the same dynamic designers that broke this market open. Our 80-member-strong R&D team develops all PCBs, software and molds in-house, enabling us to create three to four new state-of-the-art products every year. Take our featured robotic vacuum cleaner, for example.

Available in various models, it boasts:

- 80 anti-collision and cliff sensors to enable the unit to detect barriers and hazards
- New fan blade design to increase suction power
- Modular design for easy disassembly and reassembly
- Easy-to-find charging station
- Medical-grade UV sterilization lamp to kill various kinds of bacteria
- One-button detachable dustbin for easy cleaning

Our 80-member QC team performs one-meter drop and hill climbing tests to guarantee all of our products meet the

quality standards of your market. We make up to 70,000 units every month, and can have your orders delivered to you within 25 days. Call us today to discuss your requirements.
