Enterprise Strength Introduction（企业实力介绍）

1. Direct Supply from Source Factory with Strict Quality Control（源头工厂直供，严苛品质管控）

English Version:

We are a professional manufacturer integrating the research and development, production and sales of peptides. Equipped with Class 1000 standard clean workshops and full sets of automatic production lines, we independently control the entire process including raw material procurement, processing, purification, refinement, quality inspection and delivery, realizing full independent production and standardized quality management. With more than 10 years of mature purification technology and a three-level strict quality inspection system, all our peptide products maintain a stable purity of over 99%, with the highest purity reaching 99.9%. Featuring zero impurities, high biological activity and stable quality, our products fully meet the diverse needs of global customers for bulk procurement, scientific research experiments, cosmetic application and personal use. Supported by sufficient production capacity and stable in-stock inventory, we adopt a pure factory-direct sales model with no middleman markup, providing high-quality peptide products at cost-effective factory prices.
