ROYALMAKERS ELECTRICAL

About ROYALMAKERS

Royalmakers was established in 2010, SHENZHEN City, specializes in smart home cleaning appliance development and production assembly and other related processes, to provide customers with product design, manufacturing services.

10^{years} +

Manufacturing experience

5000^{m²} +

Factory area

600^{person} +

Professionals

30^{persons} +

R&D team

ESG Development

Environmental

- Energy conservation and emission reduction
- Recycled material application
- Waste disposal
- Nature conservation

Social

- Health and safety
- Employee well-being
- Social contribution

Governance

- Institutional construction
- Fight corruption and advocate integrity
- Safe production
- Social responsibility

Business Philosophy

「Innovation for Life」

For customers

Provide better service and more competitive products.

For the industry

Design and manufacture classic products for industry.

For employees

Provide good working environment and welfare benefits.

For environment

Focus on green and sustainable development

Application Development

We offer one-stop solutions for product development and manufacturing to brands. Let us plan the unexpected for you.

02 Services

Services and processes

Service Process

From 0 to 1 to 100 products, through technical verification and production verification, to achieve a successful transformation from concept to commercialization.

Requirements gathering
Analyze and sort
Confirmation and verification

Engineering prototype
Industrial design
Structural design
Electronic engineering
Software engineering

Functional testing
Quality assurance engineering
Safety verification

Production optimization and trial production
Mass production sample testing
Stability and reliability testing

Service Department

One-stop service with product design as the core

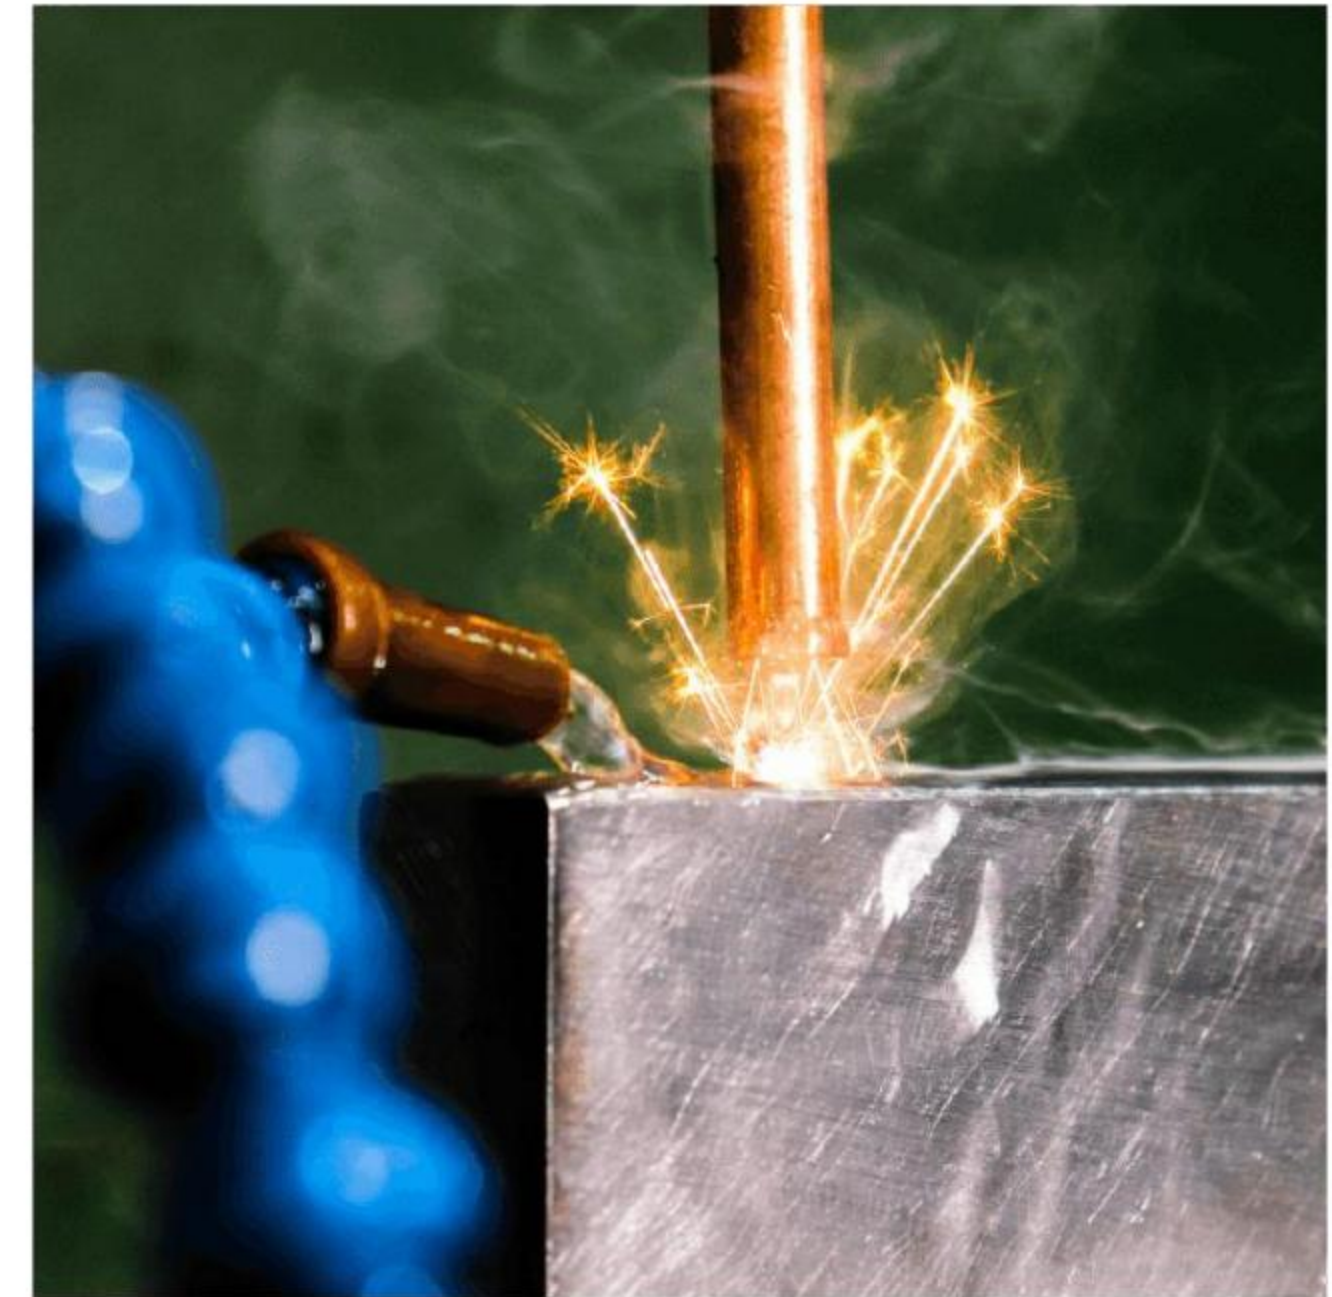

Business	R&D	Software development	Production	Quality
Cleaning appliance	ID design	UI/UX design	Engineering	R&d quality control
Injection molding foundry	Electronic design	Client program	Steel mould	Incoming material quality control
Daily products	Structural design	Server program	Injection molding	Process quality control
Sporting products		Firmware design	Processing	Outlet pipe
		Software quality control	Assembly	laboratory

Mold Manufacturing

Mold manufacturing department has more than 30 years of mold design experience with professional mold processing equipment. We can provide scientific mold flow analysis, DFM analysis, mold design, mold production, and trial production.

Equipment List

CNC milling machine	× 9
Wire EDM	× 2
Milling machine	× 5
EDM machine	× 4
Large grinder	× 5
Vertical clamping machine	× 1

Injection Molding

The injection molding department has a variety of tonnage injection molding, high-speed molding, vertical injection molding and blow molding machines.

Equipment List (78)

Hydraulic press (61)

60T	×
90T	× 3
120T	× 6
160T	× 7
200T	× 7
280T	× 15
320T	× 10
380T	× 3
470T	× 1
530T	× 2
650T	× 2
1200T	× 1

high-speed forming (13)

180T	×
190T	× 7
3	
230T	× 3

Vertical injection (2)

85T	× 1
120T	× 1

Blow Molding (2)

80T	× 2
-----	-----

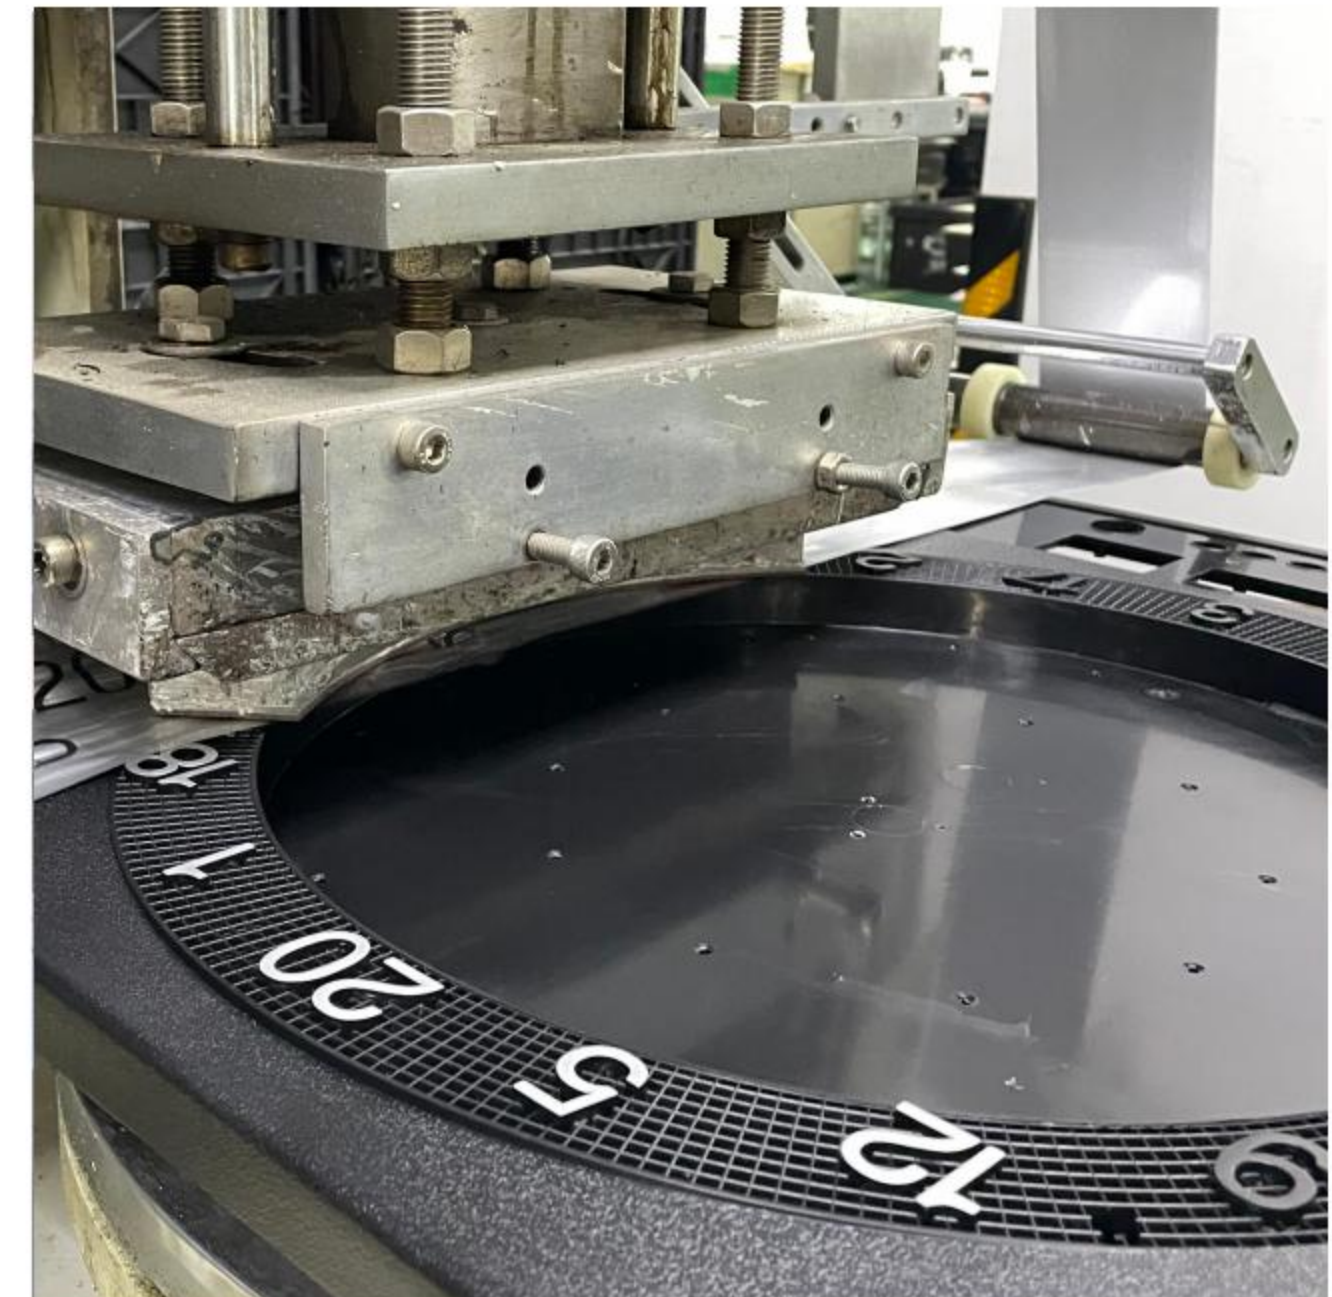

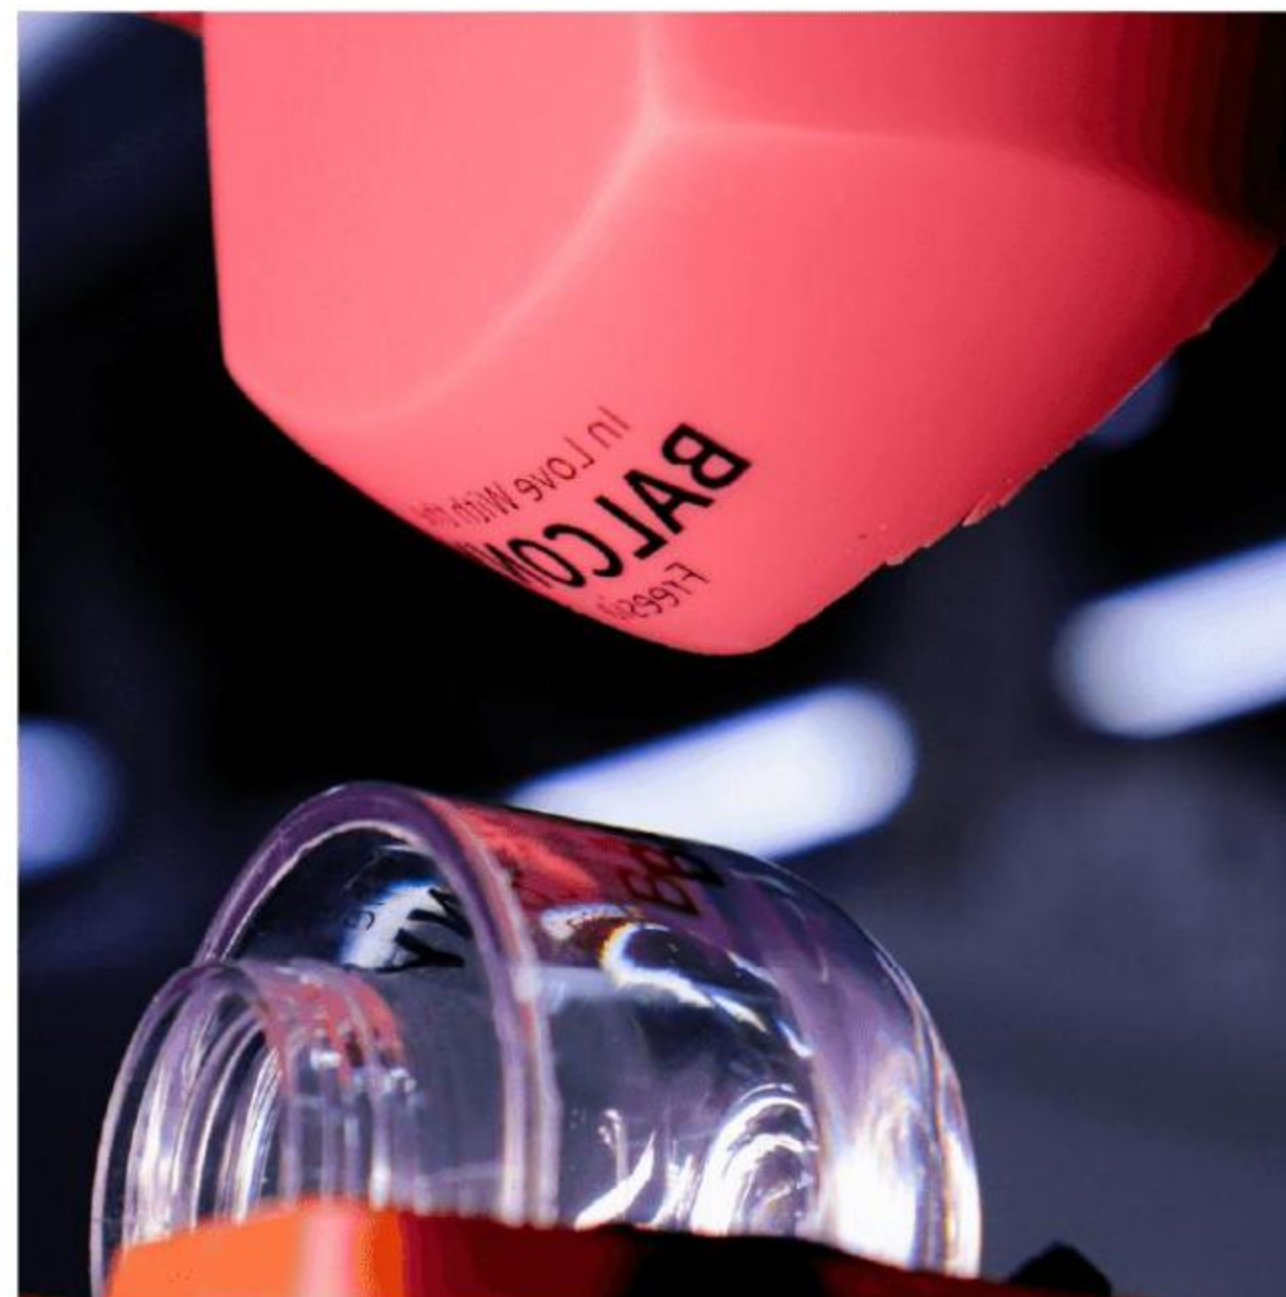

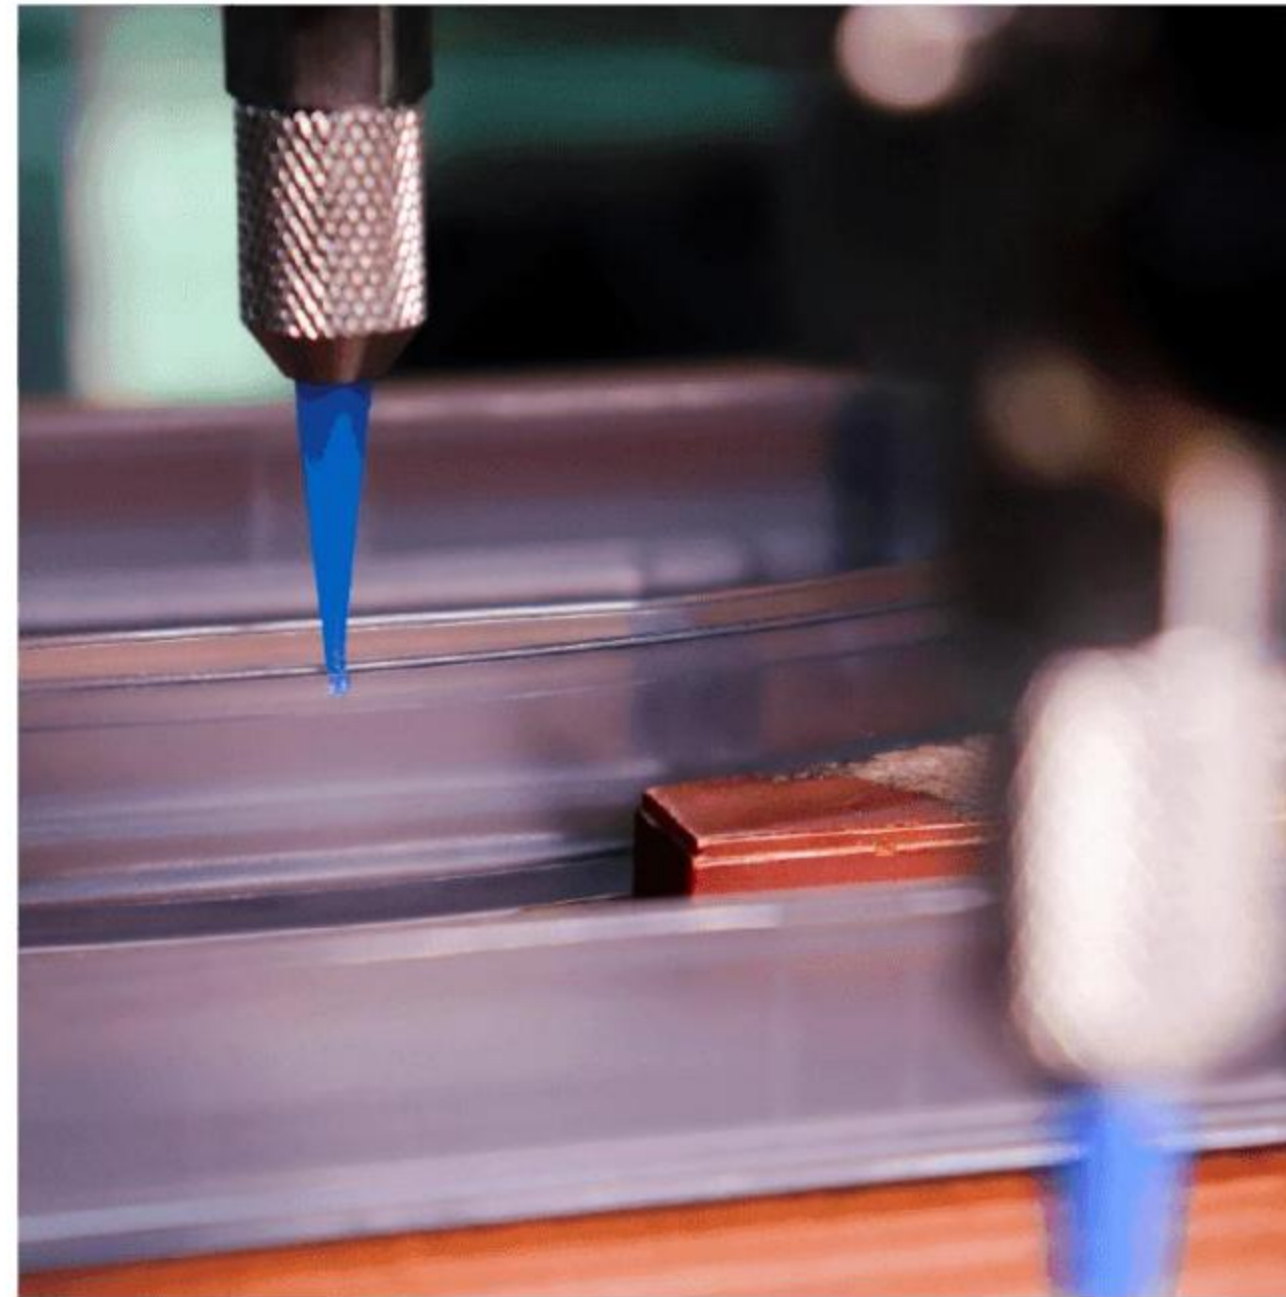

Secondary Processing

ROYALMAKERS has rich experience in surface treatment and secondary processing, including screen printing, pad printing, hot stamping, radius carving, painting and other technologies.

Processing Equipment

Printing line	× 1
Automatic painting line	× 2
Spraying line	× 2
UV painting processing line	× 2

Electronic Assembly

With automated electronic assembly line and experienced management personnel, to provide high-quality assembly quality and solutions.

Main Producing Line (11)

- Electric dartboard producing line × 4
- Robot cleaner producing line × 4
- Home Appliances producing line × 3

Quality Control

We strictly implement an ISO 9001 quality management system and have a testing laboratory and an environmental simulation laboratory where we can simulate various international testing standards and provide high-quality products.

Main testing laboratory

Testing lab

- Size detection
- Material detection
- Three dimensional detection

Reliability lab

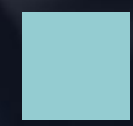

- Battery reliability test
- Package reliability test
- Material reliability test
- Product reliability test
- Tableware dishwasher simulation
- Aging test

Environmental lab

- Environmental simulation test

OPB Products

Vacuum Cleaning Appliances | Pet Supplies | Robot Pool Cleaner

Cleaning Appliances

Design various floor care cleaning robots equipped with high-tech features such as intelligent sensing, automatic navigation, and map memory to reduce people's cleaning burden.

Royalmakers Electrical Cleaning Products

RM-R2
Random Robot Vacuum

RM-L4
Gyroscope Robot Vacuum

RM-L2C
Lidar Robot Vacuum & Dust Collector

RM-S3
AI Lidar Self-cleaning Robot Vacuum

RM-V1
Wireless Handle Vacuu16

RM-V8
Handle Vacuum with Air Blower

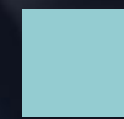

RM-V9
Wired Handle Vacuum

RM-W4PRO
Window Robot Cleaner

04 Advantages

Strong R&D Capacity | Cultures | Customers

Why choose US ?

“Manufacturing to quickly launch your products “

Being innovative

New material
New process
New product design

Cost control

Design
Mold
Manufacturing
Quality

Fast and flexible service

Quick quote
Provide solutions
Pay attention to the customer's voice

Green power Plan

Sustainable development
Energy conservation and emission reduction
Environmental protection advocacy

MISSION

Manufacture for
good design

VALUE

Self-discipline

Accountability

Teamwork

Innovation

Voice of customer

Planning

VISION

Achieve market
value to 2 billion
